Caple, is a member of AMDEA – the Association of Manufacturers of Domestic Appliances.

This membership will ensure Caple is kept fully informed of any proposed developments or changes in legislation, regulations and conditions, which may impact on the appliance industry. AMDEA's work includes supporting members who strive to reduce energy and water consumption, correctly dispose of appliances when they reach the end of their usable life and ensure that public health and safety is safeguarded at all times.

AMDEA is the UK trade association for manufacturers and importers of household appliances, large and small.

Here at Caple performance and reliability are the most important features considered when designing and manufacturing our products.

We offer a free 2 year guarantee on parts and labour with all products across the Caple range. It gives you that extra peace of mind needed when selecting the components to design your perfect kitchen, without spending an extra penny. For our extended guarantees see page 290.

better environments

With a new kitchen, performance, price and style are always important. And now the environment is too.

Choosing a product with an A, A+, A++ or even A+++ energy rating will not only help the environment, but will also cut the cost of your bills. We offer an extensive range of energy saving appliances that utilise advanced technological solutions to deliver outstanding efficiency – protecting our planet and saving you money. When looking for A, A+, A++ or A+++ energy rated appliances, watch out for our green energy efficient icon.

Energy ratings explained

All electric ovens, range cookers, refrigerators, freezers, wine cabinets, dishwashers, washing machines, washer dryers and tumble dryers are rated using a standardised method. It's handy, because it makes comparing them much easier.

Look out for electric double ovens featuring a main and smaller oven, as the energy rating will differ between the two. Washing machines have additional ratings for wash performance and spin efficiency too. Likewise, dishwashers have separate ratings for washing and drying performance.

Ssshhh

Nobody wants a noisy appliance. So we take special care to make sure ours are as quiet as possible. In fact, we have a range of low-noise, high-performance, technology. There are dishwashers, large side-by-side fridge freezers and even ultra-quiet wine cabinets.

outstanding

Create some drama in your kitchen with one of our freestanding appliances.

Freestanding appliances

Caple has freestanding appliances for every kitchen. Stunning wine cabinets, elegant range cookers, plus an ingenious tumble dryer that uses steam to reduce creases. There's also a stylish French door large fridge freezer that is 'A+' rated, the same as the majority of our refrigeration.

Tumble dryer TDF200 – see pg 256

anything but ordinary

Our fully-integrated appliances bring style to any kitchen. Effortlessly chic, with a feel that's bang up to date.

Our integrated appliances look great, and they're practical and space-saving too. From concealed refrigerators and dishwashers to washing machines and dryers, they make every bit of space work harder. Hidden away when you don't need them, instantly on-hand when you do.

Concealed appliances bring a minimalist look, freeing you up for bold statement pieces such as wine cabinets or coloured range cookers. It's an idea encapsulated in our Sense range. State-of-the-art design, yet still with advanced functionality.

seamless

Sense is a range of appliances designed to work in harmony. Smooth black glass, unwaveringly clean lines and precision-crafted stainless steel.

Revel in the detail. Sleek and unobtrusive LED-lit touch controls, elegant stainless steel handles and a precision finish. And behind the scenes, the latest technology with intelligent solutions and heaps of performance and control.

Look a little closer and you'll discover the uncompromising attention to detail that makes all the difference. Like those sleek LED-lit touch controls that maintain the smooth design continuity. And elegant stainless steel handles that combine sophistication with solid engineering.

Now look even closer, because behind those luxurious facades is the advanced electronic technology that really sets sense apart: smart thinking and intelligent solutions that deliver the ultimate in performance, functionality and control.

more than meets the eye

At Caple, we're always looking for how things can be done better. With our Sense range, we've made kitchen duty a pleasure.

Some Sense appliances come with fingertip touch control for crisp styling and ease of use. Our wine cabinets even use an advanced compressor cooling system to store wines and other drinks at the perfect temperature. There's also a downdraft hood with perimetrical extraction and motor positioning options to cut noise and boost performance.

Our steam ovens use steam injection for precise temperature consistency, and every gas hob has a Flame Safe feature which temporarily cuts gas supply if the flame goes out. Plus, there's a unique space-saving oven with a warming drawer to store your tableware until just the right moment. Performance, functionality, control. It all makes Sense.

How fitting

Our Sense modular design system brings it all together perfectly. There's everything you need for complete precision, from a touch-control fan-assisted steam oven with electronic programming, to a coffee machine that always makes the perfect cup of coffee to your taste. Bring all the appliances you need into a single, immaculate, collection.

range cookers

With outstanding performance, Caple cookers are designed with the home chef in mind. Bring flair and finesse to whatever you're cooking up.

range cooker functions

Our cooker range has every bit of functionality you need:

Function	Food
 <p>Conventional Heat <i>Top and bottom elements</i></p> <p>For cooking consistently through to the middle.</p>	 <p>Ideal for baking. For best results, use one shelf only.</p>
 <p>Top Heat <i>Top element only</i></p> <p>Gentle heat to brown the top of a dish.</p>	 <p>Ideal for pasta or potato dishes.</p>
 <p>Base Heat <i>Bottom element only</i></p> <p>For re-heating cooked food or keeping meals warm.</p>	 <p>All food types.</p>
 <p>Grill / Full Grill <i>Full width grill</i></p> <p>Even and consistent grilling.</p>	 <p>Best used for larger pieces of steak or fish.</p>
 <p>Eco Grill <i>Half width grill</i></p> <p>Energy-saving inner grill section only.</p>	 <p>Great for small portions of food, like bacon or toast.</p>

Function	Food
	<p>Rotisserie Conventional Heat / Rotisserie Grill</p>
<p>For succulent roasting and even browning.</p>	
	<p>Fan Heat <i>Fan element only</i></p> <p>Fast and economical cooking for a crispy outside and soft inside. Cooks more than one food type without transferring smells or tastes too. No pre-heat required.</p>
	<p>Great for juicy roasts.</p>
	<p>Top plus Fan Heat <i>Fan assisted top element</i></p> <p>Fast browning.</p>
	<p>To finish off a cooked dish, or melt a cheese topping without the worry of overcooking.</p>
	<p>Turbo Base Heat <i>Fan assisted bottom element</i></p> <p>Designed for delicate and slow cooking.</p>
	<p>Perfect for casseroles or stews.</p>
	<p>Turbo Conventional Heat <i>Fan assisted top and bottom elements</i></p> <p>Fast and even heat distribution. Cooks more than one food type without transferring of smells or tastes.</p>
	<p>For light and delicate baking, such as pastry or bread.</p>
	<p>Turbo Defrost <i>Fan only no elements</i></p> <p>No heat, fan only.</p>
	<p>It uses fan power at room temperature to cut defrosting time in half.</p>
	<p>Turbo Grill <i>Fan assisted full grill</i></p> <p>For quick browning.</p>
	<p>Perfect for cooking meats, while retaining all the delicious juices.</p>

sense range cookers

Bring flair and sophistication to your kitchen. And choose from a host of clever new features.

The Sense range takes the benefits of range cooking to the next level. Every model comes with a wok support, rotisserie, and responsive touch controls for intuitive precision.

Gas models also feature a dual control triple burner and the Flame Safe feature to temporarily cut the gas supply if the flame goes out. There's also an optional ceramic hob.

You already know the advantages of range cooking, so explore some of the advanced features that make Sense range cookers such a natural choice for discerning cooks. Gas ranges come with wok supports and their own rotisserie for that perfect roast. There's a ceramic hob option too.

All models have responsive touch control timers, so precision is built in. There's also a dual control triple burner on each gas model, as well as Flame Safe on all burners – so if a hob flame goes out, the gas supply to that hob is cut straight away.

Features

Fully programmable touch-control electronic LED timer
Easy to manage time display and programming functions. (1)

Rotisserie
All models have a rotisserie for exquisite oven roasting. (2)

Door glass
Heat reflective doors. Double-glazed and incorporating a full inner glass panel that's easily removed for cleaning. (3)

Flame Safe
A sensor in each burner immediately cuts the gas supply if the flame goes out. (4)

Cast-iron supports
Gas hob models come with robust cast iron pan and wok supports. (5)

Catalytic liners
Self-cleaning catalytic liners available as an optional extra on all models. (6)

LPG Jets
An alternative set of jets is supplied with each model so it can be used with bottled gas.

The dual control triple ring burner

This unique cooking option is all about flexibility and control. It works by giving you independent control of both the inner and outer flames, so you can use them alone or in combination to create optimum heat spread. This burner even has its own specially designed wok support that quickly slots neatly into place. Perfect results, whatever size or shape your pan is.

classic range cookers

Caple's Classic range of cookers combine exceptional build quality with superb all-round performance.

Each model has stacks of options for even the most ambitious chef. Choose from a range of different formats to suit your needs, such as a single or double oven and the width that's just right for your kitchen. You can also select from an all-gas model, or opt for the versatility of dual fuel. All our range cookers come with Flame Safe as well, which instantly cuts the gas supply if the flame goes out. Our ovens also have LPG jets, so they work just as well with bottled gas.

Features

Cast-iron supports

All models feature sturdy cast iron pan supports. (1)

Catalytic liners

Self-cleaning catalytic liners available as an optional extra on all models. (2)

Triple ring burner

Gas hob versions feature a powerful 3.5kw triple ring burner, for more even spread of heat across the pan. (3)

Flame Safe

A sensor in each burner instantly cuts the gas supply if the flame goes out. (4)

LPG Jets

Every model has separate jets so it can be used with bottled gas. (5)

All the heat, right where you need it

All our Classic ranges have double-glazed doors with heat-reflective glass. It means the oven door is cool to touch, while the heat is retained inside where it's needed. It's safer, more energy-efficient and it even makes for better cooking. Every Classic range cooker also comes with precision-engineered stainless steel handles, inset with black-spot glass detail.

All our compact appliances are designed to work with their matching oven, while the choice is endless, it is important that when designing your kitchen you choose the right combination for your needs.

Compact appliances can be arranged in many different formats to suit your cooking requirements and utilise space effectively. We have shown here some examples of appliances that complement one another.

To add a contemporary look to your kitchen opt for a linear design with clean, well defined edges showcasing your appliances. If space is an issue select two products sitting one on top of the other in a simple stack. Or why not create your own unique quad combining four appliances and warming drawers all of which fit neatly together.

sense ovens

A style led range of ovens with 'A' or 'A -20%' energy-rated performance, Sense control technology, and near-obsessive attention to detail.

Our top of the range Sense oven series brings you 'A -20%' energy rated performance and an uncompromising attention to detail – not only in the way it works, but in the way it looks too. Featuring innovative touch control technology, every Sense oven delivers outstanding results, whatever the cooking task.

Make the most of your space

Our C2282 oven offers superb cooking performance, even if you're short of space. At just 48cm in height, it boasts a full size oven cavity and 14 functions. Combine it with the matching SWMD1054 warming drawer and it fits perfectly into a standard single oven space, so while the oven's doing its work, you can make sure that your tableware is at the perfect temperature for serving.

sometimes big really is better

We've squeezed every bit of performance and control we could into this oven. It even helps cleaning.

At 90cm wide and with a 84 litre capacity, the C2900 brings the kind of versatility normally associated with range cookers. It also comes with telescopic shelves, rotisserie, 14 cooking functions and a touch control programmable electronic timer. There's a boost function for rapid re-heating too, plus a handy quick cleaning system and two interior lights.

Or there's the XL C3400 with two full-size 53 litre oven cavities, bringing all the versatility of a double oven, with range cooker capacity. It also features telescopic shelves, a touch control programmable electronic timer, push/pull dials, full-width inner glass doors and tangential cooling fans.

Self-cleaning technology

Our C2472 oven features pyrolytic technology to effectively eliminate the need for manual cleaning altogether.

Forget scrubbing your oven. Self-cleaning technology, or to give it its technical terminology, Pyrolytic technology works by heating the oven to 450°C, causing even hidden-away and baked-on grime to carbonise into a fine ash. When it's done, just use a damp sponge to wipe the ash out. Not only does it save you vast amounts of elbow grease, it actually improves oven efficiency over time too.

14 functions... and more

As well as range of versatile cooking functions to help you prepare that perfect meal, our 14 function ovens offer some great time and labour-saving features too.

A clever Clean function returns your oven to a fresh and spotless condition in just 60 minutes, taking advantage of special enamel with a micro-porous structure to oxidise residues at 250°C. And a Boost function which preheats the oven in super quick time, making sure it reaches just the right temperature for whatever food you're preparing.

Features

Touch control

All models have fully-programmable touch control timers, and some models have full touch control. (1)

Push-pull knobs

Some models feature ergonomic positive response push-pull dials. (2)

Door quality

Sealed cool-touch doors are fitted with high quality hinges and double or triple layer full-width glass. (3)

Telescopic shelves, catalytic liners and large side lights

Most models have telescopic shelves (fixed to chrome side racks) which make it easier to check food as it cooks. Fitted or optional catalytic liners make oven cleaning easier, and premium models (excluding C2472) have enhanced lighting with super-bright and over-sized side lights. (4)

classic ovens

kitchen engineering with everyone in mind

This high-performance classic range comes with plenty of standard and optional features.

Classically designed, as the name suggests in sheer black glass and stainless steel. There are fully-programmable electronic timers. Cool-touch doors that do just that,

they stay cool when the oven is on. Plus easy-clean shelf supports. The push-pull dials become flush to the fascia when not in use as well, for clean and smooth lines.

Clever thinking

Our C2219 ovens open to a full 180 degrees, so you can reach right inside without the interruption of a drop down door. The door frame itself is also bevelled, so it sits perfectly inside. There's also a magnetic closing system, so the door seals tightly with minimum effort. To help our oven fit seamlessly into your kitchen, the door can be reversed for total flexibility.

Uncompromising versatility

The great value C2228 oven has nine cooking functions, plus push-pull dials for sleek uninterrupted lines when not in use. When you need them, just push and they slide out. There's also a programmable electronic timer.

Features

Programmable electronic timers

You can pre-set cooking start and stop times. (1)

Cool-touch doors and control panel

The double or triple glazing and the tangential cooling fan. (2)

Shelf types

Electric models have chrome side racks, some have telescopic shelving, while the gas model has moulded shelf slots. (3)

Door quality

The C2228 has triple glazing while other models have double glazed doors with heat-reflective glass. (4)

Catalytic liners

Available on some models. They oxidise and vaporise grime away at +200°C.

steam oven

Steam is one of the most energy-efficient ways to cook food. Not only does the food taste more flavoursome, it's also healthier because the food retains more of its valuable nutrients. Great for vegetable and seafood dishes.

Better taste, and better for you as well.

now you're cooking with steam

Steam cooking is healthy, fuss-free and ensures fresh food retains its natural colours, flavours and shape. So all the natural nutrients and goodness end up on the plate and not in the pan.

Very well suited to seafood, holding-in all the delicate flavours of white fish like cod and monkfish and oily fish like salmon and tuna. Turning out crab, lobster and other shellfish to perfection. Vegetables are just as delicately cooked from fresh new potatoes to crunchy carrots and

broccoli. What is more, stodgy rice and soggy pasta will be a thing of the past.

Steam cooking – healthy, easy and odourless.

Odourless cooking

There are no food odours with steam. So you can prepare different parts of a meal together, without the flavour being altered. You can save energy too by cooking your meat and vegetables together.

Defrosting and reheating

You can also blanch, defrost and reheat with steam. Ideal for pasta, rice and mashed potato.

Delicious desserts

Why not try cooking delicious fresh fruit as a tasty snack, rice pudding, or a steamed pudding with custard?

sense SO109 combination steam oven

This model combines the benefits of an advanced steam oven, with a conventional fan-assisted oven and grill. All the technology you want, in the oven.

With a huge 30 litre capacity and 100 pre-sets from steam to turbo grill to defrost this model is ready for anything. Intuitive touch controls and an LCD display gives you access

to both steam and conventional cooking, and an auto cook menu that covers a wide range of dishes. So easy to use and when you're finished it will even clean itself.

How it works

The SO109 has an injection steam system, for a more consistent temperature during cooking. It works using a heater element in the water tank, bringing the water to temperature before injecting steam directly into the oven cavity. This model also has the added benefit of combining steam and conventional fan cooking.

Features

LED Touch controls and LCD display
The intuitive control panel lets you swiftly access all 12 functions, the electronic timer, minute minder and clock. You can also see the current cooking time and temperature. (1)

Auto setting
Choose from 100 pre-set recipes displayed on the LCD panel. Includes food weight and temperature for optimum results. You can also create and save your own customised programmes. (2)

Stainless steel interior and optional glass tray
Hygienic and easy to clean interior, shown with optional glass tray (GTRAY/SO). (3)

Injection steam
Creates a consistent temperature for better results.

Steam recovery system
Water is collected during the cooling process and recycled to reduce the amount of water used.

Clean function
Option to clean the inner cavity, and steam system.

Gastro tubs
If you like to steam a variety of food at the same time then our stainless steel Gastro tubs (optional accessories) make it easy. (4)

sense CM109 combination microwave

Full touch-control, powerful fan cooking, and stainless steel interior. It's the most advanced microwave we've ever made.

With 11 different functions it's at home in the most demanding kitchen. There are also 60 pre-set (and customisable) recipes, and also a useful keep-warm function. The CM109 seamlessly fits in with the Sense modular design system on page 14.

Cooking with the CM109

Achieve great results by combining this model with a fan or grill, using the fan or grill together, or just regular convection cooking. Everything you need, in a microwave.

Convection cooking

Bringing together a ring element and a fan to provide evenly cooked and browned results. It's quicker than conventional cooking and can be combined with the microwave to reduce cooking time even more, the grill for perfect browning – or both the microwave and grill together.

Turbo Grill

The fan cooking system and grill deliver perfect results in all kinds of meals. It even locks in meat juices for better flavour.

Features

LED Touch controls and LCD display
11 functions and six power levels at your fingertips. You can also access the auto setting microwave programmes, timer and clock. An LCD panel displays the cooking mode, remaining time and menus. (1)

Auto setting
Choose from 60 pre-set recipes displayed on the LCD panel. Includes food type, weight and temperature for ideal results. Save your own customised programmes too. (2)

Stainless steel interior and glass turntable
Its wipe-clean surface makes cleaning easier, and it looks stylish. The glass turntable can also be easily removed and cleaned. (3)

Drop down grill
A versatile grill easily lowers for simpler cleaning. (4)

sense CM2400 combination microwave

An advanced microwave with seven cooking modes including a powerful grill

Part of our exclusive Sense range, this exquisitely designed microwave is stunning in smooth black glass and stainless steel. Its distinctive black-spot stainless steel bar handle makes it a perfect match for our Sense ovens (see page 34) and our warming drawers (see page 76).

Cooking with the CM2400

Grill

Just like an oven grill, it's ideal for cheese on toast, or browning off a cooked dish.

Multi-stage cooking

For convenience this microwave can be programmed to seamlessly change from one cooking method to another as part of the same chosen programme. It could be set to defrost and when finished cook straight after without lifting a finger.

Auto Menu

The auto cook menu gives you a set of preset cooking modes, each designed to provide you with the best possible results.

our classic microwaves

A minimalist design that complements any kitchen. Plus plenty of handy, easy-to-use features.

Our CM118 model combines a microwave, grill and powerful 2500W convection oven for incredible all-round functionality. It's intuitive to use too, and oozes functionality.

The CM119, CM116 and slim-line CM112 are fine-tuned for performance. All have an integral grill, plus a range of extra features including an auto-cook menu (which is accessed through the digital door display on the CM119), auto-defrost and up to 900W of power.

A choice of depths

Our CM119, CM118 and CM116 models are designed to fit perfectly in a normal cabinet space, while the 300mm deep slim-line CM112 model is at home in a standard wall unit. Ideal if you want compact performance and versatility.

Versatile cooking

With the CM118 model, you get the power of convection cooking for superior results. The ring element and fan circulate the hot air all around the food, so even juicy roast meats are cooked to absolute perfection. Cooking time is also quicker.

For greater versatility and speed, the convection system works with the microwave. You can even use the grill for browning. Or you can combine all three.

All our Classic microwaves have a powerful grill for browning dishes, making cheese on toast or other snacks. The grill can also be used with the microwave for perfect results across a wide range of dishes.

Every model also has an advanced Auto menu function, with pre-set cooking modes and settings for improved results every time.

Features

Stainless steel interior
The stainless steel interior not only looks great, but its wipe clean surface makes hygiene a top priority too. (1)

Auto Menu
The auto cook menu gives you a set of preset cooking modes, each designed to provide you with the best possible results. On our CM119 model this menu is accessed through the digital door display. (2)

Glass turntable and chrome grilling rack
The glass turntable can be removed for easy cleaning and combines with a handy grilling rack. (3)

coffee machine

The art of the barista, plus the very latest in coffee machine technology. Everything you need, in one cup.

There are many different coffee bean varieties, each with its own taste, aroma and texture. The grind size of the coffee depends on the bean type, so adjust the grinder accordingly. The finer the grind, the slower the pour. Remember to only grind what you need there and then, as ground coffee beans soon lose flavour. If you prefer buying pre-ground coffee, you'll find a very fine grind produces the best results.

the secret to great coffee

Fantastic coffee depends many factors. The beans you use, the way they're ground, and even what temperature it is and how it is frothed. Plus, of course, finding a coffee machine that's really up to the job.

Making a perfect espresso

What you're aiming for is a pour that starts out darkly-coloured then turns into shades of caramel moving slowly, like honey. When it lightens up, stop pouring. If you don't crack it first time, keep trying.

If you like milk with your coffee, you'll also need to polish up your frothing skills. The texture depends on how the air enters the milk as you steam. You need a smooth, consistent texture where the foam and milk intertwine. Look out for blobs of froth on top, and don't boil it. If the jug's bottom is too hot to touch, it means the milk's probably reached the right temperature.

Last but not least

There's no point serving great coffee in a cold cup. So a warming drawer is an ideal addition to your coffee machine. It can sit just beneath it, and ensure your cup is always just the right temperature before you pour. Any barista will tell you, it makes a big difference.

Storage options

Keep your coffee cups and accessories stored together all in one place, with our storage drawer (SD1356 see page 78) and wooden drawer insert (SDCOFFEE see page 79).

Stylish, organised and when put near or underneath your coffee machine convenient too.

Products details

Warming drawer WMD1354 – (shown above) see pg 79

Push-pull handleless warming drawer WMD1356 – see pg 78

sense CM461 fully automatic coffee machine

Low-profile controls and effortless touch technology. Better coffee, now made easier.

Just select the type of coffee and the number of cups you want, and this machine does the rest. You can even choose how fine you want the beans ground, and the professional

steam nozzle is ideal for lattes, cappuccinos and other coffee shop favourites. What's more, it also integrates seamlessly with Caple's modular appliance system (see page 14).

Pre-set your coffee

Adjust settings such as grind time, water volume, coffee and steam temperature to make coffee that's spot on every time. So now you can have a great cup of coffee whenever you fancy it.

Features

Touch controls and LED display
Sleek touch controls allow you to choose the type of coffee instantly – one or two cups, espresso or white, decaffeinated, long coffee, hot water or steam. Each button is individually lit when selected. (1)

Dispensing nozzles
Filter options are provided to match the amount of coffee in use. The amount of water dispensed can be adjusted too, depending on the size of cup. (2)

Frothing nozzle
A powerful steam-frothing nozzle foams milk, letting you create various styles of coffee quickly and easily. (3)

warming and storage drawers

Caple's warming drawers keep tableware at just the right temperature, until the food's ready to be served.

Adding a storage drawer is a convenient and stylish way to organise your coffee and wine accessories

one less thing to juggle

Now it's easier to have perfectly warm plates, right on cue. With Caple's warming drawers you can easily adjust the temperature to whatever you need. There's even a timer that switches the heat off when you want it.

Seamlessly integrated

The ideal warming drawer should blend in with a kitchen, and not take up too much space. Our SWMD1054 model sits perfectly under the Sense 48cm C2282 built-in oven. You'll hardly even know it's there. Until dinner's ready of course.

Product details

Sense warming drawer SWMD1054 – see pg 78

Sense 48cm electric single oven C2282 – see pg 40

Features

Black-spot handle

An exact match to all of the Sense ovens and microwaves, as well as a selection of the Classic ovens. (1)

Quality interior

Precision engineered sliding runners give a high-quality feel and all models feature either a protective anti-slip mat or stylish black base. (2)

Minute minder

A mechanical timer controls the heating element, so when the timer sounds, the heater switches off too – no need to worry about over-heating. (3)

Sense SWMD1054

Warming drawer

H 120mm

**Features**

Fan heating
 Combines with the 48cm high single oven C2282 to fit into a standard single oven space
 Black glass
 Push / pull opening
 Dishes for a meal for 4 people take approx 30 mins to heat up to 70°C
 Extremely rigid to support the weight of an appliance on top
 Maximum capacity 10kg or 4 dinner plates, 4 soup plates, 3 serving bowls and 2 platters
 400W heating element with tangential fan
 30-70°C adjustable thermostat
 Smooth slide soft-close drawer runners
 Attractive black interior glass base

Electrical connection

Rated load 0.40kW
 Fuse rating 3A

WMD1356

Warming drawer

H 131mm

**Features**

Fan heating
 Stainless steel
 Push / pull opening
 Dishes for a meal for 6 people take approx 30 mins to heat up to 70°C
 Extremely rigid to support the weight of an appliance on top
 Maximum capacity 10kg or 6 dinner plates, 6 soup plates, 3 serving bowls and 2 platters
 400W heating element with tangential fan
 30-70°C adjustable thermostat
 Smooth slide soft-close drawer runners
 Attractive black interior glass base

Electrical connection

Rated load 0.40kW
 Fuse rating 3A

WMD1354

Warming drawer

H 140mm

**Features**

Fan heating
 Stainless steel
 Stainless steel, black-spot feature bar handle
 Dishes for a meal for 6 people take approx 30 mins to heat up to 70°C
 Extremely rigid to support the weight of an appliance on top
 Maximum capacity 20kg or 6 dinner plates, 6 soup plates, 3 serving bowls and 2 platters
 400W heating element with tangential fan
 30-70°C adjustable thermostat
 Smooth slide soft-close drawer runners
 90 Minute cut-off audible timer
 Anti-slip removable drawer liner
 On / off light

Electrical connection

Rated load 0.40kW
 Fuse rating 3A

WMD2954

Warming drawer

H 300mm

**Features**

Fan heating
 Stainless steel
 Stainless steel, black-spot feature bar handle
 Dishes for a meal for 6 people take approx 30 mins to heat up to 70°C
 Extremely rigid to support the weight of an appliance on top
 Maximum capacity 20kg or 12 dinner plates, 12 soup plates, 6 serving bowls and 2 platters
 400W heating element with tangential fan

storage drawer and inserts

Stylish, organised and when put near or underneath a coffee machine or wine cabinet, convenient too.

Add your accessories

Both wooden inserts have been specially designed to accommodate all the accessories associated with making the perfect cup of coffee or enjoying your favourite glass of wine.

SD1356

Storage drawer

H 131mm

Features

- Stainless steel
- Push / pull opening
- Extremely rigid to support the weight of an appliance on top
- Maximum capacity 10kg
- Smooth slide soft-close drawer runners
- Attractive black interior glass base

Storage drawer will take SDWINE and SDCOFFEE (see right) wooden inserts

SDWINE

Solid wood wine accessory insert

**Features**

Produced from solid beechwood
 Sections for various wine accessories including foil cutter, cork screw and thermometer
 8 Separate storage sections

Dimensions

Width 498mm
 Depth 484mm
 Height 40mm

Storage drawer insert shown with wine accessories which are not included.

SDCOFFEE

Solid wood coffee accessory insert

**Features**

Produced from solid beechwood
 Sections for accessories including cups, spoon, coffee and sugar
 7 Separate storage sections

Dimensions

Width 498mm
 Depth 484mm
 Height 40mm

hobs

Whether you choose gas, electric or induction, Caple's advanced technology and unswerving eye for detail means total precision every time.

choosing the right hob

Gas, electric and induction ovens all have their merits. It's really down to personal choice. You could even combine all three if you want to.

Induction

They work by creating a magnetic field between the hob and pan. They're quick, easy to use, and energy efficient as well.

Gas

Most professional kitchens opt for gas. Heat is instant and control is intuitive. Stainless steel or coloured enamel finishes are available.

Electric ceramic

Their smooth glass finish makes cleaning easier. They're also sleeker and very contemporary, making them ideal for more modern kitchens.

Electric sealed plate

If budget is a real consideration, this could be for you. There's still superb all-round performance, varied zone sizes and power levels.

Mix and match modular hobs

You could always choose to combine all four. Any number of modules can be mixed together in any sequence. In fact, the options are almost endless (see pages 108 to 113).

induction hobs

A lot of experts think induction hobs are the future. They might be right. They're hygienic, more energy-efficient, safer and easier to use.

They work by creating a magnetic field between the hob and the pan. Heat is instant, and it's easy to control. Once you remove the pan, they cool down very quickly, which is handy if kids are about. They're more energy-efficient because they only heat the pan area itself, rather than all around it. In fact, they use around 25% less energy than some hobs.

Induction hobs

Providing a flameless method of cooking, induction hobs offer a whole range of benefits. As well as delivering high levels of versatility and control, they're energy efficient. The top surface remains cool, so you don't need to worry about accidentally touching a hot burner. Only the pan gets hot and because there's no transfer of heat energy between the hob and the pan, less heat is lost.

Multi zone

Our C855i (shown above) and C875i (shown below) are multi zone induction hobs. Providing complete flexibility allowing either use of four individual zones, combining zones into two larger zones or even combining all the zones into one single large (C855i only) cooking zone.

So if you cook regularly using oversized pans like fish kettles, then the C855i or C875i will handle them with ease.

C840i

Induction hob - 13 amp

W 590mm

Features

Black frameless
 9 level digital power display
 Touch controls
 99 minute timer
 Child safety lock
 Residual heat indicators
 Automatic safety shut-off
 Automatic pan detection
 Anti-overheat
 Supplied with a 13A plug
 (shown below) for easy
 installation in any kitchen

Cooking output

4 Induction zones:
 • 2 dia. 180mm – 1.50kW
 • 2 dia. 180mm – 2.00kW

Electrical connection

Rated load 3.0kW
 Fuse rating 13A

C850i

Induction hob

W 590mm

Features

Black frameless
 9 Level digital power display
 for each zone
 Touch controls
 99 minute timer
 Child safety lock
 Residual heat indicators
 Automatic safety shut-off
 Automatic pan detection

Cooking output

4 Induction zones:
 • 2 dia. 160mm – 1.50kW
 • 2 dia. 180mm – 2.00kW

Electrical connection

Rated load 7.0kW
 Fuse rating 32A

PLEASE NOTE: The C840i induction hob achieves a 13A connection by restricting the maximum load to 3kW, this is done by cleverly limiting the combined zones to a maximum power level sum of 12.

For example if you had boiling water on power level 6 on one zone you could cook rice on power level 4 and gently warm food on level 2 on a third zone

C854i

Induction hob

W 590mm

**Features**

Black frameless
 9 level digital power display for each zone
 Slider touch control
 4 boosters
 99 minute timer
 Child safety lock
 Residual heat indicators
 Automatic safety shut-off
 Automatic pan detection

Cooking output

4 Induction zones:
 • 2 dia. 140mm – 1.50kW with booster
 • 2 dia. 220mm – 2.60kW with booster

Electrical connection

Rated load 7.0kW
 Fuse rating 32A

C855i

Induction hob

W 590mm

**Features**

Black frameless
 Multi split zones
 4 boosters
 9 level digital power display for each zone
 Slider touch control
 Programmable timer for each zone (up to 99 mins) to set finish time
 Pause function
 Child safety lock
 Residual heat indicators
 Automatic pan and small object detection
 Automatic safety shut-off
 Anti-overheat

Cooking output

4 Induction zones:
 • 4 dia. 220mm – 3.0kW
 Alternatively 2 dual zones:
 • 2 220 x 400mm – 4.0kW

The multi split zones provide complete flexibility in allowing either use of 4 individual zones, the option to combine zones into 2 larger zones for use with oversized pans like fish kettles. Further to this the hob can be fully combined into a single large zone.

Electrical connection

Rated load 7.0kW
 Fuse rating 32A

C862i

Induction hob

W 770mm

**Features**

Black frameless
 9 Level digital power display for each zone
 Booster on each zone
 Slider touch controls
 99 minute minder
 Child safety lock
 Residual heat indicators
 Automatic safety shut-off
 Automatic pan detection
 Anti-overheat

Cooking output

4 Induction zones:
 • 4 dia. 200mm – 3.0kW zones

Electrical connection

Rated load 7.4kW
 Fuse rating 30A

C871i

Ribbon induction hob

W 930mm

**Features**

Black frameless with bevelled edge
 12 Level digital power display for each zone
 Touch controls
 Booster function on all zones to access maximum temperature quickly
 Memory function to choose a specified power level at any time
 Offset programming to set cooking duration and finishing time
 Interrupt button for use during a programme
 Timer (up to 99mins)
 Electronic power monitor
 Child safety lock
 Residual heat indicators
 Automatic safety shut-off
 Automatic pan and small object detection
 Anti-overheat
 Anti-overflow

Cooking output

3 Induction zones:
 • 1 dia. 160mm – 2.20kW with booster
 • 1 dia. 280mm – 3.60kW with booster
 • 1 dia. 210mm – 3.10kW with booster

Electrical connection

Rated load 7.2kW
 Fuse rating 32A

C875i

Ribbon induction hob

W 910mm

**Features**

Black frameless

Can be inset or flush mounted

14 power levels (0-9 + bake 42°C, keep warm 70°C, boil control 94°C, booster and booster+)

Auto-on* digital display

Slider touch controls with direct access

Bridge** function to create 2 large zones

Booster and booster+ function on all zones to access maximum temperature quickly

Memory function to choose a specified power level at any time

Programmable timer to set cooking duration and finishing time on each individual zone

Timer (up to 999 mins)

Memory recall function

Pause function

Child safety lock

Residual heat indicators

Automatic safety shut-off

Automatic pan detection

Anti-overheat

Anti-overflow

Cooking output

4 Induction zones:

- 220 x 180mmmm – 3.7kW

Electrical connection

Rated load 7.4kW

Fuse rating 25A

***Auto-on function:**

Once the hob is switched on and a pan is placed on the required zone the corresponding power display automatically illuminates ready for use.

****Bridge function:**

Bridge function can be used to create 2 large zones for use with oversized pans like fish kettles.

When the hob is not in use the subtle design means it can discreetly keep a low-profile on any worktop

C900i

Induction hob

W 880mm

**Features**

Black frameless
 Can be inset or flush mounted
 11 power levels (0-9, keep warm and booster)
 Digital display
 Slider touch control
 Booster function on all zones to access maximum temperature quickly
 Programmable timer to set cooking duration and finishing time on each individual zone

4 Induction zones:
 • 2 dia. 300mm – 3.0kW
 • 2 dia. 270mm – 1.4kW

Electrical connection

Rated load 7.4kW
 Fuse rating 25A

the power of electric hobs

Caple's electric hobs are engineered with performance and ease of use in mind.

Every Caple hob has four separate zones with individual lights that glow when activated. The two small zones are ideal for smaller pans, with the other area more suited to medium-sized and larger ones, such as casserole pots and frying pans. Our C814C model includes audible touch controls, while the others in the range have traditional dial controls.

When the cooking is over the smooth black glass makes cleaning easy and with minimalist styling both frameless ceramic models will fit into any type of kitchen with ease. We also have our stainless steel C604E hob, which is a superb all-around performer which has varied zone sizes and power levels.

gas hobs

It's about control. Instant heat when you want it at exactly the power you need. But when you choose a Caple gas hob, it's also about bringing a sense of style and finesse to your kitchen.

Just turn the dial. Caple gas hobs are incredibly intuitive to operate, and have automatic electronic ignition and a range of sizes and finishes. Every model has Flame Safe technology too, which instantly cuts the gas supply if the flame goes out.

Indian, Moroccan, Chinese or Thai – whatever you're cooking up, a Caple gas hob will have you well on your way to achieving exotic dishes at home. Our top models feature powerful triple ring burners – perfect for whipping up an oriental masterpiece in your wok.

Sense style

Caple's Sense black glass hobs combine unrivalled functionality, state-of-the-art engineering and sheer style. There's also an option that sits flush with your worktop, but with the hob body recessed, making it quick and easy to clean up.

recessed hobs

The look says it all. Designed to fit perfectly with the clean and uncluttered lines of a modern kitchen, this innovative hob offers more than superb styling; there are real practical advantages too.

Flush mounted or inset into your worktop, the recessed hob is the ideal match for solid surface worktop materials like marble, granite or slate. Flat cast iron supports mean that you can move pans across the hob effortlessly – and Caple's

Flame Safe feature gives you peace of mind; if a flame goes out, the gas supply is cut almost immediately. Both models also feature a powerful triple ring burner.

Clean lines

With their elegant low-profile recessed design and exceptional styling, these superb hobs maintain the clean linear lines of your kitchen. They're thoroughly practical too – the hob's recess catches any spills and makes it easy to wipe down and clean. Discover the difference, and enjoy the intelligent cooking solution for today's kitchen.

C972G

sense touch control gas-on-glass hobs

Cool black glass. Sleek touch controls. Advanced engineering technology. If you're looking for a hob that combines contemporary design with power and functionality, a Sense touch control hob ticks all the boxes.

That elegant black glass surface doesn't just look stunning – it makes your Sense hob a breeze to clean, while linked cast iron pan supports let you easily transfer pans across burners or away from the heat. All burners are Flame Safe, so if a

flame is extinguished for any reason, the gas supply is cut straight away. Each hob also features responsive triple ring burner for extra power.

Precision built-in

We don't need to tell you that touch controls set into black tempered glass look fabulous, you can see that for yourself. With advanced digital technology giving you nine precise power levels on each burner, they also offer an exceptional level of control. The look is pure Sense. The functionality is pure Caple. Enjoy the best of both worlds.

mix and match modular hobs

Modular hob systems allow you to build the perfect hob for your needs. You can combine gas, electric, induction and extraction across a single platform, for a truly bespoke solution that's sure to impress.

Just imagine it – a hob built to your exact specifications. Combine two, three, four or more modules, of any type and in any sequence. Introduce induction cooking into your kitchen by combining it with gas or electric for full use of all pan, or wow with teppan and induction wok cooking for a touch of sophistication.

Auto-ignition gas hobs have cast iron pan supports, and when coupled with powerful downdraft extraction offer clean, fully integrated design throughout – bespoke and beautiful.

 • 1 semi-rapid burner: 1.75kW

Electrical connection

Fuse rating 3A

**Compatibility**

Our wok hobs work with numerous brands of wok, however please check compatibility prior to purchase.

C994i

Induction modular hob

W 288mm

**Features**

Black frameless
 9 Level digital power display for each zone
 Audible touch controls
 Automatic stop and temperature limiter
 Child safety lock
 Timer (up to 99mins) with audible alarm and auto switch-off
 Residual heat indicators
 Pot detection

Cooking output

2 Induction zones

- 1 zone:
dia. 140mm – 1.50kW
- 1 zone:
dia. 180mm – 2.00kW

Electrical connection

Rated load 3.50kW
 Fuse rating 20A

C892C

Electric ceramic modular hob

W 288mm

**Features**

Black frameless
 9 Level digital power display for each zone
 Audible touch controls
 Automatic stop and temperature limiter
 Child safety lock
 Timer (up to 99mins) with audible alarm and auto switch-off
 Residual heat indicators

Cooking output

2 Ceramic plates

- 1 hi-light zone:
dia. 165mm – 1.20kW
- 1 hi-light zone:
dia. 200mm – 1.80kW

Electrical connection

Rated load 3.00kW
 Fuse rating 13A

hoods

A well-engineered extractor hood does more than just help to capture odours from your kitchen. Be bold, and use it as a visual focal point too.

 cape

choosing the right hood

We've designed one for every kind of kitchen. Different colours, different finishes, and plenty of functionality.

Downdraft

This type of counter hood is installed behind or alongside your hob. When you need it, just press the button and it glides in to position.

Island chimney

Better suited to larger kitchens. They suspend over a central island unit and can make a stunning focal point.

Ceiling

They're unobtrusive and they save you space too. There are also variable extraction rates.

Built-under

Ideal for smaller kitchens. They're cleverly integrated into the underside of kitchen units.

Wall chimney

Available in all kinds of sizes, styles and finishes. Great for a dramatic centerpiece.

Conventional

This type fits snugly beneath a kitchen unit, with controls usually found on the front.

Integrated

Unobtrusively hidden behind kitchen furniture, and pulled out when needed.

downdraft extractors

Caple downdraft extractors are the epitome of intelligent thinking in kitchen design. With an ingenious under-counter installation, wall space is kept clear and if integrated into an island unit, views across the kitchen remain uncluttered.

A downdraft extractor can be housed either behind or alongside a hob, in an island unit or within a base against a wall. Fitting elegantly into the surface until activated, it rises out of the worktop beyond the height of the pans to extract odours directly from the cooking area.

These smart extractors deliver high extraction rates and give you a choice of motors and motor positioning options to suit your kitchen design. For example, your motor could be situated under the floor, on an external wall or in a cupboard, so noise can be virtually eliminated (see page 132 for all the details). With real versatility, our downdraft extractors can expel air via ducting or recirculate it using charcoal filters.

Sleek Sense styling

Sense downdraft hoods feature touch control technology and are designed to complement the other appliances within the Sense range.

Smooth operator

At the push of a button, the extractor rises smoothly up from its flush, retracted position. It can be stopped at any height up to 300mm and automatically switches on at 180mm.

sleek styling

Seamless integration, and unmistakable styling. Caple downdraft hoods combine stunning looks with maximum efficiency and flexibility.

With the flexibility to fit into virtually any hob arrangement, Caple downdraft hoods add style and functionality to your kitchen. Whether stainless steel or high-gloss black glass, you can tailor the look to compliment your design or to lead it.

Stunning looks are rivalled only by the range of features on offer – a perfect blend of style and substance.

Lighting

Cool white neon lighting adds sophistication and style, whilst complimentary blue illuminated soft-touch controls, offer an intuitive way to maximise the effectiveness of this attractive, and innovative appliance.

Flush fitting

There when you need it – designed to fit flush into your work surface, a sleek centre piece whether in use or not.

Sense DD520BK

Modular downdraft hood

W 520mm

Features

Stainless steel with a black glass panel
Illuminated touch controls
For use with gas or electric hobs
Perimetrical extraction for reduced noise and increased pressure resulting in improved motor performance
Extracts from both sides, ideal for installation between modular hobs
4 Speeds
Auto timer – switch-off after 10mins
Aluminium grease filter
Ducting spigot size 150mm
Recirculation kit available
The electrics box must be located at least 650mm from the hob

Motor options (see page 132 -133)

DDMEXT1 – in cabinet installation, 800m³/h
DDMEXT2 – ceiling cavity / under floor installation, 1000m³/h
DDMEXT2/5 – ceiling cavity / under floor installation, 1200m to 1500m³/h
DDMEXT3 – outside wall installation, 1000m³/h
DDMEXT4 – outside wall installation, 1500 to 2100m³/h
DDMEXT5 – outside chimney for roof installation, 1000m³/h brushless motor

Optional extras

Recirculation kit CAP27CF (only for use with DDMEXT1)

SEE PAGE 257 FOR VENTING KITS

Perfect fit

Able to extract from both sides, this clever hood is designed to fit seamlessly into any modular hob configuration, adding efficiency and style. (see pages 108 – 113)

Sense DD605BK

Flush downdraft hood

W 580mm

Features

Stainless steel with a flush black glass panel
Illuminated touch controls
For use with gas or electric hobs
Perimetrical extraction for reduced noise and increased pressure resulting in improved motor performance
4 Speeds
Auto timer – switch-off after 10mins
Aluminium grease filter
Ducting spigot size 150mm
Recirculation kit available
The electrics box must be located at least 650mm from the hob

Motor options (see page 132 -133)

DDMEXT1 – in cabinet installation, 800m³/h
DDMEXT2 – ceiling cavity / under floor installation, 1000m³/h
DDMEXT2/5 – ceiling cavity / under floor installation, 1200m to 1500m³/h
DDMEXT3 – outside wall installation, 1000m³/h
DDMEXT4 – outside wall installation, 1500 to 2100m³/h
DDMEXT5 – outside chimney for roof installation, 1000m³/h brushless motor

Optional extras

Recirculation kit CAP27CF (only for use with DDMEXT1)

SEE PAGE 257 FOR VENTING KITS

Touch control

Our black glass Sense hoods feature illuminated touch controls.

Sense DD905BK

Flush downdraft hood

W 880mm

**Features**

Stainless steel with a flush black glass panel
 Illuminated touch controls
 For use with gas or electric hobs
 Perimetrical extraction for reduced noise and increased pressure resulting in improved motor performance
 4 Speeds
 Auto timer – switch-off after 10mins
 Aluminium grease filter
 Ducting spigot size 150mm
 Recirculation kit available
 The electric box must be located at least 650mm from the hob

Motor options

(see page 132 -133)

DDMEXT1 – in cabinet installation, 800m³/h
 DDMEXT2 – ceiling cavity / under floor installation, 1000m³/h
 DDMEXT2/5 – ceiling cavity / under floor installation, 1200m to 1500m³/h
 DDMEXT3 – outside wall installation, 1000m³/h
 DDMEXT4 – outside wall installation, 1500 to 2100m³/h
 DDMEXT5 – outside chimney for roof installation, 1000m³/h
 brushless motor

**Touch control**

The stainless steel flush downdraft features soft-touch illuminated controls.

ceiling extractors

Style is nothing without functionality. That's why Caple's ceiling extractors come with both, as standard.

They're available in three sizes and engineered to achieve the very highest extraction rates. There's also a choice of motors, which can be positioned in a range of locations to reduce noise and free-up space.

Every Caple ceiling extractor uses our perimetric extraction system, which draws air in through narrow apertures around the full perimeter of the pan. It means higher air pressure, greater efficiency and less noise too.

Creating the right atmosphere

You can also select just the right kind of lighting you want for your kitchen. From bright white to a soft, cosy, glow.

Control at your fingertips

Our user-friendly remote control, places both power and lighting functions within easy reach. It also allows you to set the handy timer function, which automatically switches off the extractor after 10 minutes, so when you leave your kitchen you know that any odours will be gone by the time you return.

centre stage

So much more than meets the eye. The epitome of contemporary design and technology.

Perfectly complimenting any Caple product, this ceiling extractor provides performance and styling like no other.

LED strip lighting, white glass finish and intelligent features secure it's place as not only a focal point to your kitchen, but an invaluable addition.

CE900

Ceiling extractor

W 900mm

**Features**

Stainless steel

Control at your fingertips

Our user-friendly remote control, places both power and lighting functions within easy reach. It also allows you to set the handy timer function, which automatically switches off the extractor after 10 minutes, so when you leave your kitchen you know that any odours will be gone by the time you return.

orbit island chimney hood

Sculptured from stainless steel, this bold design oozes style. While under the hood, it's all about the performance.

Not only does it come with four speeds and a powerful maximum extraction rate of 800m³/h, there's also an automatic 10 minute switch-off timer, so you can leave your kitchen knowing all those unpleasant odours will be long gone by the time you return to clear away.

One touch, endless options

An easy-to-use remote control unit gives you instant fingertip control. Control the power functions, set the automatic switch-off timer and finely adjust the 50 Watt dichroic light.

motus wall chimney hood

The pinnacle of design engineering. An uncompromising example of external styling and internal excellence. The finest materials are combined to create an unrivalled extractor with exceptional looks.

Elegant efficiency

Rotary control operation with electric blue display as your Motus hood glides into action.

Stage 1
The whisper quiet perimetrical extraction system removes even the most subtle odours.

Stage 2
The black glass front rises further to reveal the aluminium filters as the extraction level increases.

Stage 3
Glides effortlessly into position to remove even the strongest cooking odours.

Stage 4
Maximum extraction when you need it most. Still operating below an impressive 55dB(A).

Motus MOT900

Wall chimney hood

W 900mm

Features

Polished stainless steel with black glass
Supplied with optional stainless steel flue
Rotary control with electronic display
Mechanical automatic opening (dependent on speed setting)
Perimetrical extraction for reduced noise and increased pressure resulting in improved motor performance
4 Speeds
10W LED strip light
Auto timer – switch-off after 10mins
Aluminium washable grease filters
Ducting spigot size 150mm
Recirculation kit available

Performance

Max. extraction 900m³/h
Max. noise level 55dB(A)

Optional extras

Recirculation kit CAP52CF

SEE PAGE 257 FOR VENTING KITS

motus touch wall chimney hood

Minimal, sleek styling and advanced design engineering combine effortlessly to make an exceptional extractor that smoothly slides into action via subtle, elegant electronic touch controls.

The Motus wall chimney hood uses perimetrical extraction to quietly remove even the most subtle odours. The stylish black glass front rises further to reveal the aluminium filters as the extraction level increases. Even at the maximum extraction rate, an impressive 900m³/h, the Motus still only has a maximum noise level of 55dB(A).

Effortlessly stylish and quietly efficient.

Motus touch MOT910

Wall chimney hood

W 900mm

Features

- Black glass and stainless steel
- Supplied with optional stainless steel flue (shown fitted above and left)
- Full touch control with electronic display
- Mechanical automatic opening (dependent on speed setting)
- Perimetrical extraction for reduced noise and increased pressure resulting in improved motor performance
- 4 Speeds
- 10W LED strip light
- Auto timer – switch-off after 10mins
- Aluminium washable grease filters
- Ducting spigot size 150mm
- Recirculation kit available

Performance

- Max. extraction 900m³/h
- Max. noise level 55dB(A)

ZZ800 wall chimney hood

Want to make a statement in your kitchen? The ZZ800 will definitely do that. In stunning stainless steel and black glass, the ZZ800 is a great addition to any modern kitchen.

The ZZ800 has electronic touch controls, an auto timer, 4 speeds - up to an impressive maximum extraction rate of 900m³/h with perimetrical extraction for reduced noise (Max. 58dB) and improved motor performance.

The aluminium grease filters are easily accessible and the subtle but elegant LED lights make this not only stylish but practical too.

Control at your fingertips

Easy to use electronic touch controls means you can concentrate on cooking your favourite dishes safe in the knowledge that the ZZ800 is doing it's job.

ZZ800

lucis wall chimney hood

Contemporary styling, at home in even the most modern kitchen. Striking appearance and compact design offer the best of both worlds – great looks and exceptional performance.

To be seen and not heard, this wall hood provides perimetrical extraction for increased pressure but with minimal noise for maximum effectiveness.

Technology in action

The smooth rotary control knob allows you to up the ante with 4 extraction speeds, shown beautifully on the electronic display.

LED lighting

For additional style and mood lighting 3 LED lights sit underneath the hood, whilst a clever auto switch off timer gives added confidence.

Lucis LUC600

Wall chimney hood

W 600mm

VENTING KITS**

mirage wall chimney hood

The strength of stainless steel, with the freshness of clear glass.
A new take on a classic design.

Mirage is the perfect balance of form and function. A concealed aluminium grease filter and gutsy 800m³/h maximum extraction rate dispel even stubborn kitchen odours, while a 10 minute automatic timer deactivates the unit when it's finished. There's also a powerful dichroic light to create a perfectly lit kitchen environment.

Stay in control

Mirage's four speed settings, light and timer function can be controlled by a simple remote control unit. You're in charge wherever you are in the kitchen.

classic hoods

From bold statement pieces to discreet integrated models. Whatever you're looking for, we'll help you find it.

You'll find a near-endless choice of styles and functionality in the Classic range. Some hoods create focal points, while others tuck discretely away. But whichever model you opt

for, you can guarantee it will perform to the highest standards and keep your kitchen free from odours and grease.

See the light

Most models in the Classic range have powerful halogen or tungsten lights, all positioned to create just the right lighting for your workspace.

Hidden power

The concealed Storm ST851 can match a wide range of hobs, and be integrated into existing chimney systems or used to create a truly eye-catching feature. It has a very powerful 900m³/h extraction, integrated lighting and four different speed settings. An automatic timer also switches it off when you're done, so it reduces energy consumption and is less hassle.

splashbacks

Not only are Caple's splashbacks designed to catch all those spits and splashes, they're also beautifully designed and finished. It's the icing on the cake.

clearly better

Caple's glass splashbacks bring clean lines and unrivalled practicality. Choose a colour and style that matches your kitchen.

Our splashbacks have reflective finishes in a range of different shades. There's even one that's designed to perfectly fit the curved canopy of our CGC stainless steel hoods range.

Product details

1 Ebony 600mm splashback, 2 CGC610SS hood with Pewter curved splashback

Safe and easy to install

Caple splashbacks are adhesive-backed. This stops them shattering and also allows fitting to any clean, non-porous surface. All our glass products meet British safety standards, and are made from toughened glass.

refrigeration

Whether you want a discreet space-saving under-counter fridge or something more spacious, you'll find it right here.

choosing the right refrigeration

We've one for every kind of kitchen, big or small. Different colours, different finishes, different sizes, and plenty of functionality.

French door

Large freestanding fridge freezers with two doors on the top for the fridge and two drawers underneath for the freezer. Great for storing large items in the fridge.

Side-by-side

Large freestanding fridge freezers. The left hand side is the freezer and the right hand side the fridge. Some need to be plumbed in as they have ice and water dispensers.

Freestanding

Freestanding split fridge freezers, with a freezer zone. A stylish and practical choice if space is an issue.

Integrated

Hidden behind furniture doors are fridge freezer combinations or compact under-counter and in-column products. Choose fridges and freezers in different sizes and combinations depending on the space available or where you want to put them in your kitchen

french door fridge freezers

Convenience, additional storage and ease of use are the benefits of a French door fridge freezer compared to other types of refrigeration. Add the fact they're available in black, white or stainless steel and come complete with an 'A+' energy rating, then you've got an efficient, modern, family friendly appliance that looks great too.

Capacity is key

If you have a big family and like fresh fruit and veg, keeping your fridge stocked up can be difficult without shopping every day. With a french door fridge freezer, the fridge has loads of room with full width shelves and drawers. With both doors also having storage in them you're unlikely to be lacking fridge space any time soon and saving yourself those extra trips to the supermarket.

Humidity Control

Help lengthen the storage time for your fresh foods by adjusting the humidity to a maximum of 80%.

french door fridge freezers

Features

Humidity control

The maximum humidity can be set as high as 80%. Helping to preserve food for longer. (1)

LED Touch controls

Easily control the temperature of the fridge and freezer from the touch control LED panel. (2)

Ice maker

Dedicated twist ice trays easily produce ice, and with a turn, store below ready for use. (3)

side-by-side fridge freezers

A big family or big on entertaining at home? Either way a side-by-side fridge freezer is ideal. They're available with or without ice and water, in either black, white or stainless steel and come complete with an 'A+' energy rating.

With or without ice and water

Like ice with your drinks? then choose between either crushed or cubed. Like chilled, filtered water? it's available at the touch of a button on CAFF205 and CAFF206 side-by-side fridge freezers.

If you'd prefer the extra space in the freezer or can't have a fridge freezer plumbed directly in to your kitchen's water supply choose the CAFF23 side-by-side fridge freezer.

Either of the models is a stylish and practical addition to any kitchen. If you have the space then the choice is yours.

side-by-side fridge freezers

Features

Ice and water

Fully automatic in-door ice and water dispenser. With the option of cubed or crushed ice at the touch of a button. (1)

Water Filter

The water filter allows fresh great tasting water to be supplied at the touch of a button. It improves the taste and odour by reducing chlorine, heavy metals and other sediments found in your water supply. It is located at the rear of the fridge compartment to allow easy access and it is quick to change with its simple twist fit installation. (2)

LED touch controls

Easily control the temperature of the fridge and freezer from the touch control LED panel. (3)

Handles

Open the doors with the beautifully crafted metal handles. (4)

double delight

Together or apart, both freestanding appliances look stunning. Minimal yet striking with performance to match.

A separate fridge and a separate freezer both with 'A++' energy ratings. Both have stainless steel clad doors and handles to add timeless style to super efficiency. If stainless steel is not for you both appliances are also available in white.

Pairing the RFL71SS with the RFZ71SS or the RFL70WH with the RFZ70WH gives you plenty of storage space if you have a large family, or prefer the flexibility of a separate fridge and separate freezer but the convenience of a side-by-side appliance.

freestanding fridge freezer

Short on space?

If you don't quite have the space to entertain a side-by-side fridge freezer, but still want a freestanding model, this fridge freezer is the obvious choice. Offering a choice of finishes, an 'A+' energy rating and plenty of storage space, style and functionality go hand in hand. The doors are also reversible, so you can fit them to suit the space available.

Model codes

Silver with stainless steel effect – RFF553 (shown left)

White – RFF552

Features

Silver stainless steel effect

A modern silver finish with a coarsely brushed stainless steel effect ensures this fridge freezer suits both stainless steel and black appliances. (1)

Glass fridge shelves

Toughened glass shelves are ideal for storing a range of food and feature a clever spill proof design. (2)

Plastic freezer drawers

Large plastic freezer drawers enable you to compartmentalise your frozen food for convenient storage. (3)

Bright interior lighting

Bold, well positioned lighting illuminates the interior of the fridge for excellent visibility. (4)

integrated refrigeration

Integrated fridges and freezers are understated, inconspicuous and so easy to use.

Choose from tall column fridge-freezer combinations, or compact under-counter models. Or perhaps an entirely separate fridge and freezer located in different spots around the kitchen. There are also tall all-in-one models that fit neatly into a single space.

Whatever you go for, it's also reassuring to know that all of Caple's integrated refrigeration appliances have an 'A+' energy rating.

Frost-free

No more laborious defrosting with a scraper. Frost-free works by heating up an element for a short time, which melts the ice and prevents build-up. Keeping a freezer ice-free means food stays fresher for longer, and it also makes food freeze quicker too – so more nutrients are locked-in. Plus it frees up valuable storage space.

Super Freeze

Some models have Super Freezing which speeds up freezing time and optimises performance.

Features

Glass shelves
With plastic trims or deluxe steel trims to catch any spills. (1)

Fresh colours
Blue transparent drawers and trays add a fresh, contemporary feel. (2)

LED lighting
Cool blue lighting adds a fresh, modern feel. (3)

Wine rack option
Add a chrome wine rack that slots in like a shelf and holds 4 750ml bottles. (4)

wine cabinets

Caple's wine cabinets create the optimum storage conditions for your wine. The correct temperature, correct humidity and the right air circulation. They even use low vibration technology to minimise disturbance. And of course, they look great.

perfection by the glass

If you've invested a lot of time and money in your wine, you'll also want the perfect place to store it too. As all wines react to their environment a Caple wine cabinet is a must-have for anyone who wants to enjoy the full aroma and flavour of a good bottle of wine.

Total control

To get the most from wine, you need to store it at the correct temperature. It actually differs for each wine. Rosés and whites should be served at 8°-14°C, sparkling wines at 6°-10°C. With reds, it's all about body. Full reds need 16°-18°C, whereas lighter reds are best at 13°-16°C. Fluctuations in temperature disturb the organic components of the wine, causing the cork to shrink or swell and air to get into the bottle. Some of our wine cabinets have multiple temperature zones to keep each wine at its optimum storage and serving temperature.

Finer wine

Vibration and humidity during storage will both influence how your wine will taste when it's finally poured. That's why Caple's wine cabinets come with anti-vibration gaskets and low vibration compressors to prevent disturbance to the wine's sediment balance. Our cabinets also create an ideal atmosphere of above 65% humidity, to preserve cork quality and prevent mould and odours. You can be confident your wine is in good hands.

Compressor cooling

When choosing a wine cabinet it's really important to consider the type of cooling system it uses. Many conventional cabinets use thermo electric technology, which is only capable of cooling to 15°C below the room's ambient temperature. So on a warm day of 25°C the contents will only cool to a minimum of 10°C, leaving your wine exposed to potentially damaging temperatures. Caple's wine cabinets use a compressor cooling system which maintains precisely the right temperature, regardless of the ambient room temperature. We've even compacted this state-of-the-art technology to fit in our slender 15cm wide model.

Well balanced

We know how important a fine wine collection is, which is why our wine cabinets are specifically designed to keep it in perfect condition.

White LED lighting

Ultraviolet light causes lightstrike, which causes wine to age prematurely. So it's important to avoid exposing bottles to sunlight or fluorescent light. Our white LED not only looks great, but it's also UV-free and there's no heat output either.

Bottle stacking

Bottles should always be stored on their side so the wine stays in contact with the cork. This keeps the cork moist and ensures a good air seal for the bottle, which prevents oxidation and immediate ageing. Wine benefits best from side storage if the level of the wine reaches at least the upper shoulder of the bottle when upright. Caple's wine cabinets provide sufficient shelves to allow for bottles to be stored either on a single level for easy reach, or stacked for longer storage.

that's entertainment

The kitchen is the heart of the home and often a good party. So choose a wine cabinet that's stylish, versatile and designed for the serious entertainer.

Caple's wine cabinets are designed to cater for every kind of occasion, big or small. They're packed with functionality and there's no better way of having perfectly chilled drinks to hand whenever you want them.

Our Sense cabinets can also be converted with an optional frosted glass shelf, letting you adapt your cabinet into a full or part can chiller that stores beer, soda and other drinks at a perfect 3°C.

Mix it up

If you're not into fine wine, then you can put our wine cabinets to equally good use to chill beers, ciders and pre-mixed drinks – which will also help free-up space in your fridge during a party. Caple's wine cabinets are easily convertible into a can chiller as well, for kids' birthday parties. So now you can grab a nice cold refreshment whenever you like.

sense wine cabinets

Stylish on the outside, intelligent on the inside. Our Sense range of wine cabinets have everything you need for the party season.

Smooth black glass

The stylish black glass and stainless steel blends seamlessly in with your kitchen. The glass is also UV-proof to keep your wine or other drinks safe from sunlight.

Caple's engineers have designed our Sense wine cabinets to function incredibly quietly, from just 42dB(A) – or about the same as an average fridge. So there's no chance of them ruining the party atmosphere.

The freestanding WF1547 can hold an amazing 132 bottles and has 3 separate temperature zones.

Features

Dark wooden shelves

The easy-slide dark wooden shelves are non-scratch and won't damage bottle labels. Their slatted design secures bottles in position and lets you overlap bottles for maximum capacity. (1) Included with all Sense models, except Wi154.

A cool 3°C

Selected Sense wine cabinets offer a broad temperature range of 3-18°C. That allows for wine to be stored at between 5-18°C, with around 3-4°C for chilling cans. (2)

Glass shelves

You can convert some cabinets into a full or part can chiller, using our pack of three frosted glass shelves. So now you can offer guests all kinds of drink options, and all at just the right temperature. (3)

Kitchen plinth

Stylish, stainless steel, plinth grilles can be used with any Sense undercounter wine cabinets. They neatly cover the ventilation hole in the plinth and blend in with your kitchen décor. Supplied with all models except Wi154 & WF1547. (4)

classic wine cabinets

Precision-crafted stainless steel, clear glass and quality beech wooden shelves. A welcome guest at any party.

Our stylish stainless steel wine cabinets are available in two sizes, with a choice of single or dual temperature zones and a quiet operation from just 42dB(A). The doorframes, plinths and shelf fronts are made from stainless steel, and the UV protected tinted glass doors are toughened for safety. Most models also come with reversible doors for the choice of left or right opening.

Built-in or freestanding

This range of wine cabinets has both undercounter and freestanding models.

Our undercounter models come in a variety of sizes and are built-in seamlessly below the worktop. Alternatively, our freestanding models create a dramatic kitchen focal point, and can easily be moved between rooms, or even houses.

In fact, Caple's wine cabinets can be kept almost anywhere in the house. The utility room, in the garage or basement. You just need to ensure the room is weather-proof, and there's an electrical socket. Our larger freestanding models also have lockable doors for added security.

Grab a bottle

Our WF1104, WF1544 and WF1546 wine cabinets (see pages 236 and 237) have pull-out shelves on telescopic rails at just the right angle, making it easy to find the bottle you're after.

Features

LED display
Shows current and set temperature within the wine cabinet. (1)

Beech shelves
The easy-slide beech wooden shelves are non-scratch and won't damage bottle labels. Their slatted design secures bottles in position, and lets you overlap bottles for maximum capacity. (2)

Humidity water tank
A humidity-controlling plastic water tank is also included. It's positioned on the top shelf of each zone and used to increase humidity, if required. (3)

Plinth choice
Apart from the Wi154 and Wi155, all the undercounter wine cabinets come with both a stainless steel adjustable plinth grille and a stainless steel recessed plinth grille. (4+5)

dishwashers

Our machines don't just leave your dishes sparkling, they also come with at least an 'A+' rating for energy, and 'A' for wash and drying performance.

caple

caple

Programs
Economy 2:59

DI628

high performers

Whether it's a quick wash or something more heavy-duty, every Caple dishwasher is designed to perform. The range includes several built-in models, to tuck away behind your kitchen doors or two modern, stylish freestanding machines. All models are now at least A+ energy rated, with the top of the range built-in model now an amazing A+++.

Extra features, extra savings

Alternative wash

This function available on the Di628 and DF630 allows the user to select either the upper or lower baskets for the load. Saving water and energy with smaller loads.

Power wash and Auto wash

Exclusive to the Di628, are the Power wash and Auto wash functions.

Power wash, when used with either intensive, normal, economy, glass and 1 hour express programmes, helps break through heavily soiled loads by increasing washing temperature and duration.

Auto wash, has sensors intelligently checking the level of cleanliness of the load to make maximum savings of time, energy and water. This can deliver a wash that uses only 8.4 litres of water.

High profile style and function

The Caple DF630 freestanding dishwasher is not only energy efficient with an 'A++' energy rating, but is also touch control.

The mirrored finish control panel is very stylish and easy to use. The curved top profile of the door contributes to the extremely stylish look.

A very modern look for a freestanding dishwasher that performs very impressively both functionally and aesthetically.

Water consumption

The whole of the range have low water consumption figures, which is not only great for the environment but your pocket also. Using the Auto wash programme on the Di628 only uses an astonishing 8.4 litres of water.

Features

Flexible cutlery tray
Models Di628 and Di626 feature clever cutlery trays that sit at the top of the dishwasher freeing up more space in the lower basket. Choose from five set-up options, (shown below) depending on what is below in the upper basket. (1)

Easily adjustable upper basket
Allows the height of the upper basket to be changed (even with full loads) with the simple release of 2 conveniently placed levers. (2)

Internal LED light
Activated when the door is opened, it helps internal illumination and looks good too! (3)

Delay timer
Allows the user to delay the start time for between 1 - 24 hours. (4)

Aquastop
Automatically cuts off the water at the first sign of a leak, helping to avoid costly water damage. (5)

Reduce water and energy usage

The Half load function is ideally suited to small loads, unlike traditional Half load programmes (which usually only utilise one basket) this uses reduced energy and water usage.

washing machines

Choose from a selection of integrated machines that tuck neatly away. Whichever you choose, you can be sure it will do the job. All our machines use the most advanced technology to make laundry day just that bit easier.

Features

Digital display
Included on all models. Shows the programme phase, spin speed and any extra functions selected. (1)

Durable stainless steel drum
For longevity, hygiene and garment care. The 1400rpm spin speed on some models means faster drying times. (2)

Extra large doors
Makes loading and unloading much easier. (3)

washer dryers

Our range of intergated washer dryers are easily operational with multiple programmes to meet all your laundry needs ensuring minimal fuss when washing and drying clothes.

Electronic controls
Included on all models. Simple controls to change between options at the click of a button. (1)

Allergy care
Removes all detergent from fabric to minimise the risk of skin irritation. (2)

Stain reduction
Our models use advance technology to maximise cleaning action ensuring your whites stay looking fresher for longer.(3)

Door safety lock
With safety in mind, due to high working temperatures during mid-cycle, the door will remain locked until the clothes cool 53°C. (4)

tumble dryers

Caple tumble dryers use state-of-the-art technology that makes every task effortless. Choose an integrated machine, or be bold and go freestanding.

Our TDF200 freestanding model has 11 different programmes, a huge 8kg drying capacity and loads of other useful features such as our clever DeCrease system. This re-uses the moisture produced during the drying process to create steam cycles that reduce creases.

The DeCrease system works best with distilled water, which can be easily accessed and topped up with distilled water from the condenser drawer.

The TDi100 and TDi110 fully-integrated tumble dryers both offer two heat settings and a venting system for the best possible performance. The TDi110 also has sensors in the drum that constantly check moisture levels, so the machine only stops when clothes are completely dry. Other handy features include a reverse tumble action, six levels of dryness and an easy-access fluff filter.

TDi110

Fully integrated sensor tumble dryer

**Performance**

- For hoods with extraction over 500m³/h
- 1 Metre flexible venting kit

150mm venting kit
(code 2653W)

- For hoods with extraction over 500m³/h
- 3 Metre venting kit

150mm venting kit
(code 2655W)

- Suitable for use with downdraft hoods
- 3 Metre ridged venting kit

Universal plinth grille
(code GRILL/SENSE)

- Stainless steel top fixing plinth grille
- Available in 2 sizes: GRILL/SENSE600 (shown) W 525mm
GRILL/SENSE300 W 250mm

Venting:

- 100mm Venting is suitable for venting cooker hoods and tumble dryers fitted with 100mm outlets where the duct run is short. It is recommended for applications requiring low extraction rates of up to 250m³/h. (equivalent flat channel dimensions 110mm x 54mm).
- 125mm Venting is recommended for air extraction installations involving longer duct runs or several bends. It is essential where extraction rates of 250 - 500m³/h are required. (equivalent flat channel dimensions 204mm x 60mm).
- 150mm venting is recommended for high powered extractors with rates of 500m³/h and above. (equivalent flat channel dimensions 220mm x 90mm).

External Motors - Due to the power and fitment of Caple external motors (DDMEXT2, DDMEXT2/5, DDMEXT3, DDMEXT4 and DDMEXT5), rigid ducting must be used.

Stainless steel grille
(code GRILL/CLASS)

- Stainless steel plinth grille with fixing brackets
- Available in 2 sizes: GRILL/CLASS600 (shown) W 600mm - for W16117, W16128, W16227, W16116, W16127, W16226
GRILL/CLASS300 W 300mm - for W13117, W13118

waste disposers

A waste disposer hidden away under the sink can help you recycle your food scraps and leftovers like potato peelings, chicken bones, egg shells and tea bags. It's clean, it's green and it leaves you less to clutter up your bin.

It couldn't be easier or more convenient to use. Simply turn on the cold tap and the disposer, then empty everything into the sink. The disposer grinds the food waste into fine particles and flushes the waste away down the drain.

Since more than 25% of household refuse is food, that means much less rubbish for the dustmen to take away to clog up our landfill sites, and a reduction in the amount of greenhouse gases emitted. Disposer waste can actually be recycled into a soil conditioner once it reaches the water treatment plant, so you will be making a positive contribution to your environment.

 DD905SS

Installation made easy

Minimum cabinet depth depends on orientation, hob type and worktop material. Cabinet base may need to be cut or routed to accommodate height of unit.

If positioned behind a hob, minimum cabinet width for DD520/605 hoods is 600mm and for DD905/910 hoods is 900mm.

If positioned alongside a hob, the cabinet may need to be reinforced to strengthen where the base has been modified.

The hood can be fitted right up to either a gas or electric hob, but always ensure that the independent electronics box in the cupboard below is installed at least 650mm from the heat source.

The hood can be ducted from both sides enabling the downdraft to be positioned behind a hob and under-counter oven.

guarantees and extended warranty

All Caple appliances come with a 2 year parts and labour guarantee.

You can extend this to provide a full 5 years parts and labour protection.

The benefits of taking out an extended guarantee

The Caple Protection plan has been carefully put together in conjunction with one of the UK's leading warranty specialists, Domestic & General Insurance PLC. Caple customers who take out the extended cover benefit from:

- Up to 5 years parts and labour warranty against breakdown
- A nationwide network of Caple-approved engineers to undertake repairs in the home
- Protection against accidental damage the moment you join
- A replacement appliance should the repair of the original be uneconomic or impossible
- Access to a UK based contact centre, 365 days a year
- Receive a discount of £10 for Direct Debit payments plan enables the cost to be spread over ten months

Here's how much it costs for 5 years cover (which includes the 2 year manufacturers guarantee), either by a one off payment or a Direct Debit (DD) payment plan.

Caple Repair Plan premiums					
	One off	DD		One off	DD
Cooking			Refrigeration
