**WELCOME
TO A NEW
DIMENSION
OF SPA**

DNA STARPOOL

**Flows and treatments through
the use of heat, water and relaxation.**

“This formula, with its ancient origins, is the true essence of every Starpool spa. We express our passion for the culture of well-being through the design and constant search for quality of our products and services.”

A handwritten signature in blue ink, reading 'Riccardo Turri'.

SWEET IS

**Sweet is purity of form,
functionality and beauty.
Sweet is a unique, unmistakable,
inimitable style.**

The simple lines transform the shower, the sauna and the steam bath into furnishings that are aesthetically adaptable to every ambience. The transparency and translucence of the coatings add brightness to relaxing moments while ensuring maximum hygiene.

Sweet Collection ensures that well-being is not the exclusive right of hotels or fitness centres, but can also be part of daily home life.

SWEET IS... GREEN

Energy-saving technologies

All Sweet products are fitted as standard with the Starpool "Green Pack", a set of functions that can reduce energy consumption: automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature.

All Sweet products can be fitted with Starpool's "Eco Spa Technology" software for the automated management of all spa equipment, remote control and diagnosis and optimisation of energy use. Eco Spa Technology helps control energy distribution, avoiding any overrun of the maximum kW rating in use and resulting in long-term financial savings.

Bio-compatibility

All Sweet products are designed with eco-sustainability in mind.

The sauna wood is 100% natural and is untreated. Constant controls of the wood used permit the selection of types with a low formaldehyde content and further drying in wood furnaces reduces the release of this substance by over half of the permitted limit. The special working of the slats and the construction system employed limits the use of adhesives in the installation phase, thus optimising the healthiness of the surroundings.

Sustainable production

All Sweet products are manufactured with a low environmental impact with limited energy consumption from clean and renewable sources, recyclable raw materials and external emissions equal to zero.

Renewable materials

Sweet products are manufactured from highly recyclable materials that represent over 75% of their weight. The simple system for dismantling the components makes it easy to recover the raw materials at the end of a product's life-cycle.

Natural, reusable packaging

All Sweet products are dispatched in firwood boxes from the Fiemme Valley that can be collected and re-used many times over, thus reducing the use of new packaging materials.

Let's make a difference!

At Starpool we sort waste materials and, where technically possible, we regenerate the components of products that have been withdrawn and are no longer in use.

Be green

Being green is not just a slogan for Starpool: it is a daily commitment to the future.

The Sweet product range

Sweet products are available in a wide variety of dimensions and layouts. Designed to accommodate more than one person, they can be inserted into every type of environment and ideally meet spatial requirements, all while retaining their technical and aesthetic qualities. Sweet products include various models of showers, heat baths, steam baths and ready-to-install saunas, supplied with internal coatings and a wide range of standard equipment. Their modularity permits the realisation of professional well-being solutions, whether for domestic environments or for large-scale spas, ensuring quick and easy installation operations, while offering a single point of contact for the creation of a high-quality spa environment.

THE FORM OF MY WELL-BEING SPACE

SweetSpa

A TRUE SPA DEDICATED TO SELF-TREATMENT IN JUST 3 M²

SweetSpa represents all of the Starpool philosophy for those looking for a professional, emotional, engaging and interactive well-being experience. A perfect synthesis of leading-edge technology, inimitable design and selected materials, SweetSpa is ideal for the home, for hotel rooms, spas and all environments dedicated to personal wellness.

MULTITASKING

With SweetSpa, Starpool has invented a concept that gives a new dimension to self-treatment based on multifunctionality and maximum personalisation.

STEAM BATH

The professional direct admission system allows the steam bath, aromatised with eucalyptus, to reach a temperature of 43/45°C in a few minutes with a relative humidity of 98%.

SHOWER

The shower experience can be personalised each day, immersed in a bathroom of colour accompanied by your favourite.

SENSORY SHOWERS

SweetSpa offers the delicate emotions of Breeze, a fresh, blue, nebulisation aromatised with mint and Rain, a summery rain with the amber of maracuja.

SPA SYSTEM PROGRAM

Four different programs to personalise your own well-being experience. A simple touch selects the TONIC, RELAX, PURIFY or EXCITE programs that can be enhanced with the "SweetSpa Treatments" sensory cosmetic products: perfumed poultices, special scrubs and marine muds.

COLOUR

The lighting features of SweetSpa add all the beneficial effects of the use of colours to every treatment and can be left to fade in and out or set to your preferred tone.

MUSIC

The music kit offers the four sound selections of the SweetSpa program. An MP3 player with USB and Bluetooth technology is fitted as standard for you to enjoy SweetSpa with your choice of music.

SPA SYSTEM PROGRAM: YOUR EVERY DESIRE

Four regenerating paths, each characterised by 15 minutes of steam bath surrounded by music, colours, aromas, emotional showers and your choice of well-being treatments.

TONIC

For revitalising the organism, accompanied by vigorous and stimulating sounds with the intensity of the green light.

Self-treatment: chocolate scrub to smooth and strengthen the skin, while its scent helps in producing endorphins to give a sense of joy.

RELAX

For relieving stress, soothed by relaxing sounds in the depths of the blue light.

Self-treatment: mandarin poultice to relax surface tissues and ease muscle tension, producing a feeling of mental and physical relaxation.

PURIFY

For restoring balance to the notes of sounds that produce a stabilising effect, accompanied by yellow light.

Self-treatment: detox mud from the Dead Sea to treat unsightly excess fluid build-up.

EXCITE

For restoring vigour by means of a selection of dynamic sounds, with the force of red light.

Self-treatment: salt from the Dead Sea with white musk, with energising, remineralising and adrenalin effects thanks to its special perfume.

REGULATORS

These modulate the temperature and water flow of the shower and wall jet

WALL JET

The wall jet is ideal for refreshing the body during the steam bath and facilitating the cleaning of the SweetSpa

SPA SYSTEM PROGRAM

Four paths for self-treatment:
TONIC - RELAX - PURIFY - EXCITE

SIMPLICITY AT JUST ONE TOUCH

An intuitive touch-screen panel selects paths and functions with a simple gesture: the touch of your fingers expresses your desires.

BREEZE

Particles of nebulised water blue light with the essence of cold mint

LIGHT

White light

MUSIC

Playing and adjusting music

RAIN

Drops of warm water
amber light
essence of maracuja

STEAM

Intense steam bath
aromatised with eucalyptus

ALARM

Stops all functions in cabin
and disconnects power

COLOURS

One touch: alternates coloured lights
Two touches: sets light colour at preferred tone

FUNCTIONAL DESIGN

All the functionality of SweetSpa is enriched by selected materials and stylistic solutions designed to offer an attractive form to match the high-quality content.

Crystal white

Walls of white back-painted crystal. Seating and floor in white solid surface.

Crystal black

Walls of black back-painted crystal. Seating and floor in black solid surface.

Luxury Calacatta

Walls of Calacatta marble. Seating and floor in white solid surface.

Luxury Eramosa

Walls of Eramosa marble. Seating and floor in black solid surface.

red dot design award
best of the best 2011

1_DOOR

The wide glazing provides insulation against noise and frees space. The large handle, ergonomic and sleek, offers a comfortable grip and provides SweetSpa with a further touch of personality.

2_FRAME

The chrome effect and light elegance of the finishing embellishes the sleek lines of SweetSpa.

3_TOUCH-SCREEN DISPLAY

A practical touch screen with an intuitive interface allows swift and simple selection of the SweetSpa functions and programs.

4_SUSPENDED SEATING

The suspended seating, detached from the wall, means easy cleaning and no water build-up. The solid surface of the seating is anti-static and anti-bacterial.

5_LIGHTING

The lighting features of SweetSpa add all the beneficial effects of the use of colours to every treatment and can be left to fade in and out or set to your preferred tone.

6_ZERO GROUTING

With a grout surface of less than 1% of the glass or marble coating, SweetSpa is a product that offers the best guarantee for hygiene.

Be
green

7_SHOWER/SHOWERS

Shower head integrated into the ceiling in a unique solution with white light and two sensory showers, each accompanied by an emotional aroma and coloured LEDs.

8_TECHNICAL SPACE WITH CARRIAGE

The sliding carriage containing the technical space allows ordinary maintenance to be carried out fully autonomously in simple operations. Where space is lacking the technical space can be installed at a remote location.

PRACTICALITY

SweetSpa is a spa model with a shower ready to install. Installation is fast and safe, even in areas where flooring is already present. The product can be removed and reassembled elsewhere at any time.

LOW CONSUMPTION

Energy consumption is low and compatible with domestic use.

BE GREEN

SweetSpa is fitted as standard with the "Green Pack" system, with automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature, all of which optimises energy consumption and avoids wasting energy.

SweetSpa XL

DOUBLE THE PLEASURE OF SWEET SPA

The XL version doubles the pleasure of SweetSpa while maintaining unchanged its qualities, functionalities and content. The larger dimensions can accommodate up to four people thanks to the seating designed to optimise the comfort of couples or for sharing wellness with all the family.

TECHNICAL DETAILS

PERSONAL EDITION

The Personal version is recommended for private use, whether at home, in hotel rooms or in an area booked in a spa where users can decide when, with whom and how to enjoy and personalise their own well-being experience.

THE ESSENCE OF WELL-BEING

SweetSauna90

A FINNISH SAUNA IN LESS THAN 3 M²

SweetSauna90 encapsulates the culture of the Nordic tradition and builds on it via innovation. The use of light and colours, the choice of materials, the ergonomics of the instruments and the harmony of the design elevate the sauna space into an elegant and exclusive pleasure: at home, in the spa and in all ambiances dedicated to personal wellness.

MULTIFUNCTIONAL

With SweetSauna90, Starpool has invented a way of personalising the sauna with emotional aromas, music, colour and well-being programs, all available with a simple gesture.

HEAT BATH

The internal stove adjacent to the crystal wall recreates the principles of the Finnish sauna with a temperature of 80-90°C and a relative humidity of 10-20%.

SPA SYSTEM PROGRAM

Four different programs to customise your well-being experience. A simple touch selects the TONIC, RELAX, PURIFY or EXCITE paths to surround you with heat, aromas, colours and music.

COLOUR

The lighting features of SweetSauna90 add all the beneficial effects of the use of colours to every treatment and can be left to fade in and out or set to your preferred colour.

MUSIC

The music kit offers the four preset sound selections of the SweetSauna90 program. There is also an audio MP3 player with USB and Bluetooth technology.

SPA SYSTEM PROGRAM: ALL YOUR DESIRES

Four regenerating paths, each characterised by 15 minutes of heat bath surrounded by music, colour and inviting perfumes.

TONIC

For revitalising the organism, accompanied by vigorous and stimulating sounds with the intensity of the green light.

Fragrance of mint and vanilla.

RELAX

For relieving stress, soothed by relaxing sounds in the depths of the blue light.

Fragrance of sweet orange and lime tree.

PURIFY

For restoring balance to the notes of sounds with a stabilising effect, accompanied by yellow light.

Fragrance of pine.

EXCITE

For recovering vigour by means of a selection of dynamic sounds, with the force of red light.

Fragrance of orange and ginger.

SIMPLICITY AT JUST ONE TOUCH

An intuitive touch-screen panel selects paths and functions with a simple gesture: the touch of your fingers expresses your desires.

SPA SYSTEM PROGRAM

5_LIGHTING

The lighting features of SweetSauna90 add all the beneficial effects of the use of colours to every treatment and can be left to fade in and out or set to your preferred tone.

6_TECHNICAL SPACE WITH DRAWER

The sliding drawer containing the technical space allows ordinary maintenance to be carried out fully autonomously in simple operations. Where space is lacking the technical space can be installed at a remote location.

7_NATURAL AIR EXTRACTION

The non-forced extraction system from below ensures constant natural air recycling and healthiness.

PRACTICALITY

SweetSauna90 is a Finnish sauna model that is ready to install. Installation is fast and safe, even in areas where flooring is already present. The product can be removed and reassembled elsewhere at any time.

LOW CONSUMPTION

Energy consumption is low and compatible with domestic use.

BE GREEN

SweetSauna90 is fitted as standard with the "Green Pack" system, with automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature, all of which optimises energy consumption and avoids wasting energy.

SweetSauna90 XL

DOUBLE THE PLEASURE OF SWEET SAUNA

The XL version of SweetSauna90 maintains the qualities, functionalities and content unchanged. The innovative seating designed to optimise space allows you to share wellness with all the family or with friends.

SweetSauna Infrared

THE SAUNA THAT HEATS FROM WITHIN

The infrared version is a particularly effective, safe and localised heat treatment. The ceramic lamps, filled with lava sand, and the low-temperature infrared technique release heat through the ergonomic seating to heat the body from within. The absence of any stove means that SweetSauna infrared can also be installed in complete safety in non-controlled areas such as hotel rooms.

Infrared technology powered by

PHYSIO THERM[®]
Infrarotkabinen

SweetSauna90 Combi

A SAUNA FOR ALL TASTES

SweetSauna90 Combi is the perfect solution for those who wish to feel free to choose at any moment. With its double system of a traditional stove and infrared lamps for localised heat treatment, it offers the best of the two sauna worlds, with the high temperatures of the classic Finnish sauna (80/90°C) or an enveloping, more gentle warmth (35/40°C). This combined solution can be installed in all ambiances dedicated to well-being and is also available in the XL version.

Infrared technology powered by

PHYSIO THERM[®]
Infrarotkabinen

THE COMPACT STEAM BATH

SweetSteamSmart

STEAM & WATER FOR ANY SPACE

With SweetSteamSmart the steam bath and shower combine to create a place to regenerate that can be adapted to any space. Available in two sizes, it can be installed in any surroundings and offers maximum customisation thanks to its components and the wide range of coatings that emphasise the design. Its professional technologies transform the bathroom into an authentic spa.

BE SMART

The dimensions, coatings, arrangements, colours and music all personalise the steam bath.

STEAM BATH

The professional direct admission system allows the steam bath to reach a temperature of 43-45°C with a relative humidity of 98%.

SHOWER

With SweetSteamSmart taking a shower also becomes a unique experience. Inspired by nature, the rain effect with an open sky gives a new dimension to moments dedicated to self-treatment.

SENSORY SHOWERS

SweetSteamSmart offers the delicate emotions of Breeze, a fresh, blue, nebulisation aromatised with mint and Rain, a red summery rain with maracuja.

TOUCH-SCREEN DISPLAY

Comfort is translated into user-friendly technology and the smart experience offers quick and easy access to all functions via the touch screens using the simple, intuitive interface.

COLOUR

The lighting features of SweetSteamSmart add all the beneficial effects of the use of colours to every treatment and can be left to fade in and out or set to your preferred tone.

MUSIC

The music kit offers the preset Spa Music by Starpool sound selections. Optional MP3 and Bluetooth.

FUNCTIONAL DESIGN

The hidden technology, eye for detail and choice of materials offer performance and aesthetics in a perfect framework.

WALLS

BENCH

Crystal white

Walls of white back-painted crystal. Seating in white solid surface.

Crystal black

Walls of black back-painted crystal. Seating in black solid surface.

Luxury Calacatta

Walls of Calacatta marble. Seating in white solid surface.

Luxury Eramosa

Walls of Eramosa marble. Seating in black solid surface.

1_DOOR

Comfort, practicality and accessibility thanks to the door extended to 87 cm in width.

2_TOUCH-SCREEN DISPLAY

A practical touch screen with an intuitive interface allows swift and simple selection of the SweetSteamSmart functions and programs.

3_LIGHTING

The lighting features of SweetSteamSmart add all the beneficial effects of the use of colours to every treatment and can be left to fade in and out or set to your preferred tone.

4_ZERO GROUTING

With a grout surface of less than 1% of the glass or marble coating, SweetSteamSmart is a product that offers the best guarantee for hygiene.

Be
green

5_SHOWER/SHOWERS

Shower head integrated into the ceiling in a unique solution with white light and two sensory showers, each accompanied by an emotional aroma and coloured LEDs.

6_TECHNICAL SPACE WITH CARRIAGE

The sliding carriage containing the technical space allows ordinary maintenance to be carried out fully autonomously in simple operations. Where space is lacking the technical space can be installed at a remote location.

7_FRAME

In the Vision version the front wall is set in an elegant, 3-cm thick solid surface framework.

PRACTICALITY

SweetSteamSmart is a steam bath model with shower that is ready to install. Installation is fast and safe, even in areas where flooring is already present. The product can be removed and reassembled elsewhere at any time.

LOW CONSUMPTION

Energy consumption is low and compatible with domestic use.

BE GREEN

SweetSteamSmart is fitted as standard with the "Green Pack" system, with automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature, all of which optimises energy consumption and avoids wasting energy.

HEAT IN ANY SPACE

SweetSaunaSmart

LIGHT WITH HEAT

The essence of oak wood meets the transparency of glass.
An ideal spatial continuity for forming part of the vanguard of wellness, leaving behind the stereotypes of tradition and giving the sauna a new perspective, where the light filters from the outside to illuminate the surroundings.

BE SMART

The dimensions and arrangements are designed to meet more unusual requirements in terms of space without sacrificing either comfort, quality or functionality.

HEAT BATH

The internal stove adjacent to the crystal wall recreates the principles of the Finnish sauna: temperature 80-90°C and relative humidity 10-20%.

RITUALS

The internal stove permits the ritual of the "Aufguss" (casting). Water, perfumed by essential oil, is cast over hot stones in the stove, increasing humidity and creating an enveloping cloud of perfumed steam.

TOUCH-SCREEN DISPLAY

Comfort is translated into user-friendly technology and the smart experience offers quick and easy access to all functions via the touch screens using the simple, intuitive interface.

COLOUR/MUSIC

The lighting features of SweetSaunaSmart add all the beneficial effects of the use of colours to the well-being experience and can be left to fade in and out or set to your preferred tone.

The music kit offers the preset Spa Music by Starpool sound selections.
Optional MP3 and Bluetooth.

FUNCTIONAL DESIGN

SweetSaunaSmart offers an eye for detail, sleek aesthetics and materials of natural inspiration that are pleasing to the touch and further intensify the sauna experience.

5 TECHNICAL SPACE WITH DRAWER

The sliding drawer containing the technical space allows ordinary maintenance to be carried out fully autonomously in simple operations. Where space is lacking the technical space can be installed at a remote location.

6 FRAME

In the Vision version the front wall is set in an elegant, 3-cm thick natural oak framework.

PRACTICALITY

SweetSaunaSmart is a Finnish sauna model that is ready to install. Installation is fast and safe, even in areas where flooring is already present. The product can be removed and reassembled elsewhere at any time.

LOW CONSUMPTION

Energy consumption is low and compatible with domestic use.

BE GREEN

SweetSaunaSmart is fitted as standard with the "Green Pack" system, with automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature, all of which optimises energy consumption and avoids wasting energy.

SweetSaunaSmart Infrared

THE SAUNA THAT HEATS FROM WITHIN

The infrared version is a particularly effective, safe and localised heat treatment. The ceramic lamps, filled with lava sand, and the low-temperature infrared technique release heat through the ergonomic seating to heat the body from within. The backrests, fitted with SensoCare® technology, use special thermal sensors to constantly monitor the skin temperature and release the heat while regulating its intensity according to the readings. The absence of any stove means that SweetSaunaSmart infrared can also be installed in complete safety in non-controlled areas such as hotel rooms.

Infrared technology powered by

PHYSIO  **THERM**[®]
Infrarotkabinen

SweetSaunaSmart Combi

A SAUNA FOR ALL TASTES

SweetSaunaSmart Combi is the perfect solution for those who wish to feel free to choose at any moment. With its double system of a traditional stove and infrared lamps for localised heat treatment, it offers the best of the two sauna worlds, with the high temperatures of the classic Finnish sauna (80/90°C) or an enveloping, more gentle warmth (35/40°C). This combined solution can be installed in all ambiances dedicated to well-being.

Infrared technology powered by

PHYSIO  **THERM**[®]

LIGHT PLAYS AND STEAM GEOMETRIES

SEH

SweetSteamPro

THE STEAM BATH

With SweetSteamPro the rich tradition of well-being meets creativity, innovation and design to develop a concept of great expressive force. This visionary project revolutionises the classic design of steam baths: characterised by selected coatings and innovative technologies, SweetSteamPro qualitatively improves the performances of a place that has always been dedicated to personal well-being.

NOT JUST STEAM

SweetSteamPro is a modular product supplied internally coated and with a wide range of equipment.

STEAM BATH

The patented Air Steam System mixes the steam with the air in the correct quantities and distributes it uniformly, increasing the temperature to 43/45°C and the relative humidity to 98%.

SENSORY AROMA

The aroma of eucalyptus mixed with steam enters the cylinder, which is coated with a solid surface and internally lit, emphasising the benefits of the steam bath.

COLOUR

Colour is disseminated in the steam and reflected on the walls. There is a choice of 6 set colours: red, blue, green, yellow, fuchsia and cyan, or they can fade in and out to produce moving chromatic effects.

MUSIC

Music kit with preset selection of Spa Music by Starpool and audio MP3 player with USB technology as standard. Optional Bluetooth.

FUNCTIONAL DESIGN

SweetSteamPro is distinguished by its logical stylistic solutions. Forms, selected coatings and patented technologies ensure the hygiene and healthiness of the steam bath.

WALLS

Crystal white

Walls of white back-painted crystal. Seating in white solid surface.

Crystal black

Walls of black back-painted crystal. Seating in black solid surface.

Luxury Calacatta

Walls of Calacatta marble. Seating in white solid surface.

Luxury Eramosa

Walls of Eramosa marble. Seating in black solid surface.

SEATING AND STEAM CYLINDER

1_DOOR

Comfort, practicality and accessibility. Thanks to the door extended to 87 cm in width, SweetSteamPro is the first professional barrier-free product.

2_ZERO GROUTING

With a grout surface of less than 1% of the glass or marble coating, SweetSteamPro is a product that offers the best guarantee for hygiene.

3_SUSPENDED SEATING

The suspended seating, detached from the wall, means easy cleaning and no water build-up. The solid surface of the seating is anti-static and anti-bacterial.

4_MODULARITY

SweetSteamPro is a finished product, supplied with internal coating, consisting of self-supporting modular walls with high-tech fittings. Their self-supporting nature eliminates the need for masonry

work while their modularity ensures fast and safe installation. The product can be removed and reassembled elsewhere at any time, safeguarding the investment over time.

5_SAFE STEAM ADMISSION

The steam issuing from the solid surface cylinder ensures safe admission of the steam and avoids guests entering into direct contact with the heat source.

6_PATENTED AIR STEAM SYSTEM

The exclusive patented Air Steam System produces a special mixture of steam, fresh air and aromas to produce better air quality with uniform distribution that avoids stratification.

7_ALARM BUTTON

The alarm system communicates remotely and permits rapid intervention in the event of an emergency.

8_WALL JET

The number of jets increases as the dimensions of SweetSteamPro are increased. The jet is ideal for refreshing the body during the steam bath and for facilitating cleaning.

BE GREEN

SweetSteamPro is fitted as standard with the "Green Pack" system, with automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature, all of which optimises energy consumption and avoids wasting energy.

SweetSaunaPro

design **Cristiano Mino**

TRADITION COMBINED WITH INNOVATION

SweetSaunaPro

THE FINNISH SAUNA

With SweetSaunaPro the Nordic tradition of the Finnish sauna meets Italian design. Asymmetries, two-tone patterns and non-parallel lines show imagination and creativity. The sawn or brushed effect of the oak surfaces emphasise the natural texture of the wood and make the heat bath yet more welcoming.

HEAT, COLOUR, PERFUMES AND MUSIC

The volumes, fittings and forms of SweetSaunaPro are equipped with numerous accessories to create a unique model of ready-to-install sauna.

HEAT BATH

The internal stove recreates the principles of the Finnish sauna with a temperature of 80-90°C and a relative humidity of 10-20%. Alternatively, the stove with humidifier offers a new version: the "soft sauna" with a temperature 50-60°C and a relative humidity of 40-60%.

NATURAL AROMA

The heat of the sauna releases the persistent scent of the wood, making the heat bath yet more welcoming. Natural or treated ThermoWood oak is full-bodied, perfumed and capable of instilling serenity through the toasted notes it produces.

COLOUR

Colour follows the elegant lines of these slats to emphasise form and materiality. There is a choice of 6 set colours, red, blue, green, yellow, fuchsia and cyan, that can also fade in and out to produce moving chromatic effects.

MUSIC

Music kit with preset selection of Spa Music by Starpool and audio MP3 player with USB technology as standard. Optional Bluetooth.

FUNCTIONAL DESIGN

SweetSaunaPro is the result of a project developed by the Starpool design team which, with its special attention to materials, proportions and technical innovations, combines comfort and excellent performance.

winner 2012

1_DOOR

Comfort, practicality and accessibility. Thanks to the door extended to 87 cm in width, SweetSaunaPro is the first professional barrier-free product.

2_SUSPENDED SEATING

The seating suspended from the flooring means easy cleaning.

3_MODULARITY

SweetSaunaPro is a finished product, supplied with internal coating, consisting of self-supporting modular walls with high-tech fittings. Their self-supporting

nature eliminates the need for masonry work while their modularity ensures fast and safe installation. The product can be removed and reassembled elsewhere at any time, safeguarding the investment over time.

4_SAFETY AND CONTROL

The stove, the natural centre of the sauna, is in an absolutely safe position, isolated from the structure by means of a wall of crystal/marble for total protection from the heat. The pressure safety system installed above the stove disconnects the supply to ensure greater safety.

5_ALARM BUTTON

The alarm system communicates remotely and permits rapid intervention in the event of an emergency.

BE GREEN

SweetSaunaPro is fitted as standard with the "Green Pack" system, with automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature, all of which optimises energy consumption and avoids wasting energy.

PERIMETER DIMENSIONS

MINIMUM ROOM HEIGHT

All Starpool products comply with current European standards. Starpool reserves the right to modify or update the technical specifications and dimensions of products without notice. If the purchaser intends to install Starpool products in non-EU where standards differ from European CE standards, the purchaser must indicate the necessary additional requirements to Starpool.

Sweet MediterraneanPro

design **Cristiano Mino**

THE FASCINATION OF ANCIENT RITUALS

Sweet MediterraneanPro

THE MEDITERRANEAN BATH

With SweetMediterraneanPro the ancient rituals of the hot baths are revived to modern standards. Its modular system, selected coatings, innovative technologies and patented techniques allow SweetMediterraneanPro to offer an alternative to the intense heat of sauna and steam bath, with a soft, enveloping and tender warmth thanks to its patented system of radiating walls.

NOT JUST HEAT

The modularity of SweetMediterraneanPro is enhanced by its standard instrumentations to create an absolutely original atmosphere, exclusive to the Mediterraneo by Starpool technique.

HEAT BATH

The patented system ensures that the heat radiates from the walls, increasing the ambient temperature to 45-50°C with a relative humidity a 55-65%. The transfer effect of the heat stimulates a gradual and uniform perspiration without stressing the physique.

SENSORY AROMA

SweetMediterraneanPro's distinguishing emotional qualities are produced by the ceiling distributor which releases an aromatic flow onto the warm stones of the stove accompanied by an energising red light. This timed nebulisation creates a warm cloud of steam that diffuses a delicate scent of lavender into the surroundings.

COLOUR

Colour is disseminated in the steam and reflected on the walls. There is a choice of 6 set colours: red, blue, green, yellow, fuchsia and cyan, or they can fade in and out to produce moving chromatic effects.

MUSIC

Music kit with preset selection of Spa Music by Starpool and audio MP3 player with USB technology as standard. Optional Bluetooth.

FUNCTIONAL DESIGN

SweetMediterraneanPro is a project developed by Starpool's Research & Development department. The system of walls with integrated heating combined with the Mediterranean technique creates a unique, unusual and sensory ambience.

Crystal white

Walls of white back-painted crystal. Seating in white solid surface.

Crystal black

Walls of black back-painted crystal. Seating in black solid surface.

Luxury Calacatta

Walls of Calacatta marble. Seating in white solid surface.

Luxury Eramosa

Walls of Eramosa marble. Seating in black solid surface.

1_DOOR

Comfort, practicality and accessibility. Thanks to the door extended to 87 cm in width, SweetMediterraneanPro is the first professional barrier-free product.

2_ZERO GROUTING

With a grout surface of less than 1% of the glass or marble coating, SweetMediterraneanPro is a product that offers the best guarantee for hygiene.

3_SUSPENDED SEATING

The suspended seating, detached from the wall, means easy cleaning and no water build-up. The solid surface of the seating is anti-static and anti-bacterial.

4_MODULARITY

SweetMediterraneanPro is a finished product, supplied with internal coating, consisting of self-supporting modular

walls with high-tech fittings. Their self-supporting nature eliminates the need for masonry work while their modularity ensures fast and safe installation. The product can be removed and reassembled elsewhere at any time, safeguarding the investment over time.

5_PATENTED TECHNIQUES

The exclusive patented system with radiating walls supplies a constant heat that is further emphasised by the Mediterranean technique created by Starpool. The ceiling distributor releases a nebulisation of water perfumed with lavender onto warm stones of the stove to produce a slight increase in humidity.

6_ALARM BUTTON

The alarm system communicates remotely and permits rapid intervention in the event of an emergency.

7_WALL JET

The number of jets increases as the dimensions of SweetMediterraneanPro are increased. The jet is ideal for refreshing the body during the steam bath and for facilitating cleaning of SweetMediterraneanPro.

BE GREEN

SweetMediterraneanPro is fitted as standard with the "Green Pack" system, with automatic door closing, a door-open sensor capable of switching the heat supply off and "Energy Efficient" software to control and maintain the temperature, all of which optimises energy consumption and avoids wasting energy.

SweetShower

design **Cristiano Mino**

A NEW SENSE OF WATER

SweetShower

THE BATH THE SHOWER AS A MEMORABLE EXPERIENCE

SweetShower is the shower system that redefines the relationship between body and water. Colours, jets varying in intensity, inviting scents and sounds combine in a rain sensation thanks to the wide shower head. Moments dedicated to self-treatment each day become an awakening of the senses, with the warmth, the sting of the mist, cold with mint and the exotic maracuja all helping to improve the day with a genuinely memorable experience.

BE SMART

Multifunctional and versatile, SweetShower means personalisation and maximum interaction. A unique control system synthesises all functions on a simple and intuitive touch screen.

SHOWER

In SweetShower the shower head is discreet and tangible: it is also visible when not in use and can create a void from which water and light originate to transform the shower into a unique experience.

SENSORY SHOWERS

SweetShower offers the delicate emotions of Breeze, a fresh, blue, nebulisation aromatised with mint and Rain, a red summery rain with maracuja.

TOUCH-SCREEN DISPLAY

Comfort is translated into user-friendly technology with quick and easy access to all functions via the touch screen using the simple, intuitive interface.

COLOUR/MUSIC

The lighting features of SweetShower add all the beneficial effects of the use of colours to the well-being experience and can be left to fade in and out or set to your preferred tone.

Music kit with preset selection of Spa Music by Starpool. Audio MP3 player and Bluetooth optional.

FUNCTIONAL DESIGN

SweetShower is the new high-tech shower from Starpool. A combination of elements and a sophisticated design enclose functionality and beauty in a single space.

WALLS

Crystal white
Walls of white back-painted crystal.

Crystal black
Walls of black back-painted crystal.

Luxury Calacatta
Walls of Calacatta marble.

Luxury Eramosa
Walls of Eramosa marble.

1 DOOR

Comfort, practicality and accessibility thanks to the door extended to 87 cm in width.

2 TOUCH-SCREEN DISPLAY

A practical touch screen with an intuitive interface quick and easy access to the SweetShower functions and programs.

3 LIGHTING

The lighting features of SweetShower add all the beneficial effects of the use of colours to every treatment and can be left to fade in and out or set to your preferred tone.

4 ZERO GROUTING

With a grout surface of less than 1% of the glass or marble coating, SweetShower is a product that offers the best guarantee for hygiene.

5_SHOWER/SHOWERS

Shower head integrated into the ceiling in a unique solution with a “summer downpour” effect, with white light and two sensory showers, each accompanied by an emotional aroma and coloured LEDs.

6_TECHNICAL SPACE WITH DRAWER

The sliding drawer containing the technical space allows ordinary maintenance to be carried out fully autonomously in simple operations. Where space is lacking the technical space can be installed at a remote location.

7_FRAME

In the Vision version the front wall is set in an elegant, 3-cm thick solid surface framework.

PRACTICALITY

SweetShower is a shower model that is ready to install. Installation is fast and safe, even in areas where flooring is already present. The product can be removed and reassembled elsewhere at any time.
